Front Matter: Volume 8671
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

ISSN: 1605-7422
ISBN: 9780819494450

*Paper Numbering:* Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

</table>
8671 08  Fast radioactive seed localization in intraoperative cone beam CT for low-dose-rate prostate brachytherapy [8671-8]
Y. Hu, J. Xiong, G. Cohan, M. Zaider, G. Mageras, M. Zelefsky, Memorial Sloan-Kettering Cancer Ctr. (United States)

8671 09  A dynamic dosimetry system for prostate brachytherapy [8671-9]
N. Kuo, Johns Hopkins Univ. (United States); E. Dehghan, Philips Research North America (United States); A. Deguet, D. Y. Song, J. L. Prince, J. Lee, Johns Hopkins Univ. (United States)

8671 0A  Fully automated prostate magnetic resonance imaging and transrectal ultrasound fusion via a probabilistic registration metric [8671-10]
R. Sparks, Rutgers, The State Univ. of New Jersey (United States) and Case Western Reserve Univ. (United States); B. N. Bloch, Boston Medical Ctr., Boston Univ. (United States); E. Feleppa, Lizzi Ctr. for Biomedical Engineering, Riverside Research Institute (United States); D. Barratt, Univ. College London (United Kingdom); A. Madabhushi, Case Western Reserve Univ. (United States)

8671 0B  Nonrigid liver registration for image-guided surgery using partial surface data: a novel iterative approach [8671-11]
D. Rucker, Y. Wu, J. E. Ondrake, T. S. Pheiffer, A. L. Simpson, M. I. Miga, Vanderbilt Univ. (United States)

SESSION 3  CARDIOTHORACIC AND RADIOTHERAPY PROCEDURES

8671 0C  Cryo-balloon catheter localization in fluoroscopic images [8671-12]
T. Kurzendorfer, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); A. Brost, Stanford Univ. (United States); C. Jakob, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); P. W. Mewes, Siemens AG (Germany); F. Bourier, Sanford Univ. (United States) and Krankenhaus Barmherzige Brüder (Germany); M. Koch, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); K. Kurzidim, Krankenhaus Barmherzige Brüder (Germany); J. Hornegger, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); N. Strobel, Siemens AG (Germany)

8671 0D  Respiratory motion influence on catheter contact force during radio frequency ablation procedures [8671-13]
M. Koch, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany); A. Brost, Stanford Univ. (United States); J. Hornegger, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany) and School in Advanced Optical Technologies (Germany); N. Strobel, Siemens AG (Germany)

8671 0E  Image-based modeling and characterization of RF ablation lesions in cardiac arrhythmia therapy [8671-14]
C. A. Linte, J. J. Camp, M. E. Rettmann, D. R. Holmes III, R. A. Robb, Mayo Clinic (United States)

8671 0F  Validation of 3D surface imaging in breath-hold radiotherapy for breast cancer: one central camera unit versus three camera units [8671-15]
T. Alderliesten, A. Betgen, C. van Vliet-Vroegindeweij, P. Remeiher, The Netherlands Cancer Institute - Antoni van Leeuwenhoek Hospital (Netherlands)
SESSION 4 HEAD AND NECK PROCEDURES

8671 0G 3D surface imaging for guidance in breast cancer radiotherapy: organs at risk [8671-16]  
T. Alderliesten, A. Betgen, C. van Vliet-Vroegindeweij, P. Remeijer, The Netherlands Cancer Institute - Antoni van Leeuwenhoek Hospital (Netherlands)

8671 0H Robot-assisted intracerebral hemorrhage evacuation: an experimental evaluation [8671-17]  
J. Burgner, Vanderbilt Univ. (United States) and Leibniz Univ. Hannover (Germany); P. J. Swaney, R. A. Lathrop, Vanderbilt Univ. (United States); K. D. Weaver, Vanderbilt Univ. Medical Ctr. (United States); R. J. Webster III, Vanderbilt Univ. (United States)

8671 0I Automatic segmentation of intra-cochlear anatomy in post-implantation CT [8671-18]  
F. A. Reda, B. M. Dawant, Vanderbilt Univ. (United States); T. R. McRackan, R. F. Labadie, Vanderbilt Univ. Medical Ctr. (United States); J. H. Noble, Vanderbilt Univ. (United States)

8671 0J A gaussian mixture + demons deformable registration method for cone-beam CT-guided robotic transoral base-of-tongue surgery [8671-19]  
S. Reaungamornrat, W. P. Liu, S. Schafer, Y. Otake, S. Nithiananthan, A. Uneri, J. Richmon, Johns Hopkins Univ. (United States); J. Sarger, Intuitive Surgical, Inc. (United States); J. H. Siewerdsen, R. H. Taylor, Johns Hopkins Univ. (United States)

8671 0K Retractor-induced brain shift compensation in image-guided neurosurgery [8671-20]  
X. Fan, S. Ji, Thayer School of Engineering at Dartmouth (United States) and Norris Cotton Cancer Ctr., Dartmouth Hitchcock Medical Ctr. (United States); D. Roberts, Dartmouth Medical School (United States) and Norris Cotton Cancer Ctr., Dartmouth Hitchcock Medical Ctr. (United States); K. Paulsen, Thayer School of Engineering at Dartmouth (United States), Dartmouth Medical School (United States) and Norris Cotton Cancer Ctr., Dartmouth Hitchcock Medical Ctr. (United States)

SESSION 5 VISUALIZATION AND SEGMENTATION

8671 0L How a surgeon becomes superman by visualization of intelligently fused multi-modalities [8671-21]  
O. Erat, O. Pauly, Technische Univ. München (Germany); S. Weidert, P. Thaller, E. Euler, W. Mutschler, Ludwig-Maximilians-Universität München (Germany); N. Navab, P. Falavolitta, Technische Univ. München (Germany)

8671 0M Non-photorealistic rendering for minimally invasive procedures [8671-22]  
J. Raab, H. Schäfer, Friedrich-Alexander-Universität Erlangen-Nürnberg (Germany); A. Brost, Stanford Univ. (United States); M. Stamminger, Friedrich-Alexander-Universität Erlangen-Nürnberg (Germany); M. Pfister, Siemens AG (Germany)
Interactive 3D segmentation of the prostate in magnetic resonance images using shape and local appearance similarity analysis [8671-23]
M. Shahedi, Baines Ctr. for Translational Cancer Research, London Health Science Ctr. (Canada) and Robarts Research Institute, The Univ. of Western Ontario (Canada) and Biomedical Engineering Graduate Program, The Univ. of Western Ontario (Canada); D. W. Cool, C. Romagnoli, Robarts Research Institute, The Univ. of Western Ontario (Canada); A. D. Ward, Baines Ctr. for Translational Cancer Research, London Health Science Ctr. (Canada) and Biomedical Engineering Graduate Program, The Univ. of Western Ontario (Canada)

Multi-atlas-based automatic 3D segmentation for prostate brachytherapy in transrectal ultrasound images [8671-24]
S. Nouranian, S. S. Mahdavi, The Univ. of British Columbia (Canada); I. Spadinger, W. J. Morris, British Columbia Cancer Agency (Canada); S. E. Salcudean, P. Abolmaesumi, The Univ. of British Columbia (Canada)

A statistical multi-vertebrae shape+pose model for segmentation of CT images [8671-25]
A. Rasoulian, R. N. Rohling, P. Abolmaesumi, The Univ. of British Columbia (Canada)

Estimating periodic organ motions based on inverse kinematics using tetrahedron mesh registration [8671-26]
N. Kang, J.-Y. Kim, K. H. Kim, H.-E. Lee, J. D. K. Kim, Samsung Advanced Institute of Technology (Korea, Republic of)

Sources of error in CEMRA-based CFD simulations of the common carotid artery [8671-27]
M. O. Khan, Univ. of Toronto (Canada); B. A. Wasserman, Johns Hopkins Univ. (United States); D. A. Steinman, Univ. of Toronto (Canada)

A patient specific 4D MRI liver motion model based on sparse imaging and registration [8671-28]
Y. H. Noorda, L. W. Bartels, M. van Stralen, J. P. W. Pluim, Univ. Medical Ctr. Utrecht (Netherlands)

Sensitivity analysis and automation for intraoperative implementation of the atlas-based method for brain shift correction [8671-29]
I. Chen, A. L. Simpson, K. Sun, Vanderbilt Univ. (United States); R. C. Thompson, M. I. Miga, Vanderbilt Univ. (United States) and Vanderbilt Univ. Medical Ctr. (United States)

Image based cardiac acceleration map using statistical shape and 3D+t myocardial tracking models; in-vitro study on heart phantom [8671-30]
A. Pashaei, G. Piella, X. Planes, Univ. Pompeu Fabra (Spain); N. Duchateau, T. M. de Caralt, M. Sitges, Univ. de Barcelona (Spain); A. F. Frangi, Univ. of Sheffield (United Kingdom)

Measuring soft tissue material properties using stereovision and indentation: a proof-of-concept study [8671-31]
S. Ji, X. Fan, A. Hartov, Thayer School of Engineering at Dartmouth (United States); D. W. Roberts, Dartmouth Hitchcock Medical Ctr. (United States); K. D. Paulsen, Thayer School of Engineering at Dartmouth (United States) and Dartmouth Hitchcock Medical Ctr. (United States)
SESSION 7 KEYNOTE AND ORTHOPEDIC PROCEDURES

8671 0X A video guided solution for screw insertion in orthopedic plate fixation [8671-33]
J. Magaraggia, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany) and Siemens AG (Germany); G. Kleinzig, R. Graumann, Siemens AG (Germany); E. Angelopoulou, J. Hornegger, Friedrich-Alexander-Univ. Erlangen-Nürnberg (Germany)

8671 0Y Model-based cone-beam CT reconstruction for image-guided minimally invasive treatment of hip osteolysis [8671-34]
Y. Otake, J. W. Stayman, W. Zbijewski, R. J. Murphy, M. D. Kutzer, R. H. Taylor, J. H. Siewerdsen, M. Armand, Johns Hopkins Univ. (United States)

SESSION 8 REGISTRATION AND TRACKING

8671 0Z Automatic real-time tracking of fetal mouth in fetoscopic video sequence for supporting fetal surgeries [8671-35]
R. Xu, T. Xie, J. Ohya, B. Zhang, Waseda Univ. (Japan); Y. Sato, Osaka Univ. (Japan); M. G. Fujie, Waseda Univ. (Japan)

8671 10 A knowledge-driven quasi-global registration of thoracic-abdominal CT and CBCT for image-guided interventions [8671-36]
L. Zhang, C. Chefd’hotel, V. Ordy, Siemens Corp. Technology (United States); J. Zheng, X. Deng, Siemens Ltd. China (China); B. Odry, Siemens Corp. Technology (United States)

8671 11 Significant acceleration of 2D-3D registration-based fusion of ultrasound and x-ray images by mesh-based DRR rendering [8671-37]
M. Kaiser, Siemens AG (Germany) and Univ. Leipzig (Germany); M. John, A. Borsdorf, Siemens AG (Germany); P. Mountney, R. Ionasec, Siemens Corp. Technology (United States); A. Nöttling, Siemens AG (Germany); P. Kiefer, J. Seeburger, T. Neumuth, Univ. Leipzig (Germany)

8671 12 Thin plate spline feature point matching for organ surfaces in minimally invasive surgery imaging [8671-38]
B. Lin, Y. Sun, X. Qian, Univ. of South Florida (United States)

8671 13 3D-3D registration of partial capitate bones using spin-images [8671-39]
R. Breighner, D. R. Holmes III, S. Leng, K.-N. An, C. McCollough, K. Zhao, Mayo Clinic (United States)

8671 14 A framework for measuring TRE at the tip of an optically tracked pointing stylus [8671-40]
A. L. Simpson, N. P. Dillon, M. I. Miga, Vanderbilt Univ. (United States); B. Ma, York Univ. (Canada)
SESSION 9 ROBOTICS AND NEEDLE PROCEDURES

8671 15 Percutaneous needle placement using laser guidance: a practical solution [8671-42]
S. Xu, National Institutes of Health (United States); A. Kapoor, Siemens Corp. Research (United States); N. Abi-Jaoudeh, National Institutes of Health (United States); K. Imbesi, Duke Univ. (United States); C. W. Hong, Lerner College of Medicine, Cleveland Clinic (United States); D. Mazilu, National Institutes of Health (United States); K. Sharma, Children’s National Medical Ctr. (United States); A. M. Venkatesan, E. Levy, B. J. Wood, National Institutes of Health (United States)

8671 16 Software for MR image overlay guided needle insertions: the clinical translation process [8671-43]
T. Ungi, P. U-Thainual, Queen’s Univ. (Canada); J. Fritz, I. I. Iordachita, Johns Hopkins Univ. (United States); A. J. Flammang, Siemens Corp. Research (United States); J. A. Carrino, Johns Hopkins Univ. (United States); G. Fichtinger, Queen’s Univ. (Canada)

8671 17 A fully actuated robotic assistant for MRI-guided prostate biopsy and brachytherapy [8671-44]
G. Li, H. Su, W. Shang, Worcester Polytechnic Institute (United States); J. Tokuda, N. Hata, C. M. Tempany, Brigham and Women’s Hospital (United States); G. S. Fischer, Worcester Polytechnic Institute (United States)

8671 18 Design of a decoupled MRI-compatible force sensor using fiber bragg grating sensors for robot-assisted prostate interventions [8671-45]
R. Montareli, Johns Hopkins Univ. (United States); R. Seifabadi, G. Fichtinger, Queen’s Univ. (Canada); I. Iordachita, Johns Hopkins Univ. (United States)

SESSION 10 KEYNOTE AND DIGITAL OPERATING ROOM AND KNOWLEDGE INTEGRATION IN THE OR: JOINT SESSION CONFERENCES 8671 AND 8674

8671 19 Integration of intraoperative and model-updated images into an industry-standard neuronavigation system: initial results [8671-46]
T. J. Schaewe, Medtronic, Inc. (United States); X. Fan, S. Ji, Thayer School of Engineering at Dartmouth (United States) and Norris Cotton Cancer Ctr., Dartmouth Hitchcock Medical Ctr. (United States); L. Hiemenz Holton, Medtronic, Inc. (United States); D. W. Roberts, Dartmouth Medical School (United States) and Norris Cotton Cancer Ctr., Dartmouth Hitchcock Medical Ctr. (United States); K. D. Paulsen, Thayer School of Engineering at Dartmouth (United States), Dartmouth Medical School (United States) and Norris Cotton Cancer Ctr., Dartmouth Hitchcock Medical Ctr. (United States); D. A. Simon, Medtronic, Inc. (United States)

8671 1A Ontology-based prediction of surgical events in laparoscopic surgery [8671-47]
D. Katić, Karlsruher Institut für Technologie (Germany); A.-L. Wekerle, Heidelberg Univ. (Germany); F. Görtner, Karlsruher Institut für Technologie (Germany); H. Kenngott, B. P. Müller-Stich, Heidelberg Univ. (Germany); R. Dillmann, S. Speidel, Karlsruher Institut für Technologie (Germany)
Integration of 3D 1H-magnetic resonance spectroscopy data into neuronavigation systems for tumor biopsies [8671-48]
B. Kanberoglu, Arizona State Univ. (United States); N. Z. Moore, Barrow Neurological Institute, St. Joseph’s Hospital and Medical Ctr. (United States); D. Frakes, L. J. Karam, Arizona State Univ. (United States); J. P. Debbins, Arizona State Univ. (United States) and Barrow Neurological Institute, St. Joseph’s Hospital and Medical Ctr. (United States); M. C. Preul, Barrow Neurological Institute, St. Joseph’s Hospital and Medical Ctr. (United States)

SESSION 11 ULTRASOUND IMAGE GUIDANCE: JOINT SESSION WITH CONFERENCES 8671 AND 8675

Freehand ultrasound calibration: phantom versus tracked pointer [8671-49]
M. Welch, J. Andrea, T. Ungi, G. Fichtinger, Queen’s Univ. (Canada)

Development of a 3D ultrasound-guided system for thermal ablation of liver tumors [8671-50]
H. R. S. Neshat, Robarts Research Institute (Canada) and The Univ. of Western Ontario (Canada); D. W. Cool, The Univ. of Western Ontario (Canada); K. Barker, L. Gardi, Robarts Research Institute (Canada); N. Kakani, The Univ. of Western Ontario (Canada); A. Fenster, Robarts Research Institute (Canada) and The Univ. of Western Ontario (Canada)

Geometric reconstruction using tracked ultrasound strain imaging [8671-51]
T. S. Pheiffer, A. L. Simpson, J. E. Ondrake, Vanderbilt Univ. (United States); M. I. Miga, Vanderbilt Univ. (United States) and Vanderbilt Univ. Medical Ctr. (United States)

SESSION 12 NOVEL IMAGING, PROCEDURES, AND DEVICES

Quantitative evaluation of treatment related changes on multi-parametric MRI after laser interstitial thermal therapy of prostate cancer [8671-52]
S. Viswanath, Case Western Reserve Univ. (United States); R. Toth, Rutgers, The State Univ. of New Jersey (United States); M. Rusu, Case Western Reserve Univ. (United States); D. Sperling, New Jersey Institute of Radiology (United States); H. Lepor, Langone Medical Ctr., New York Univ. (United States); J. Futterer, Nijmegen Medical Ctr., Radboud Univ. (Netherlands); A. Madabhushi, Case Western Reserve Univ. (United States)

A flexure-based wrist for needle-sized surgical robots [8671-53]
D. P. Losey, P. A. York, P. J. Swaney, J. Burgner, R. J. Webster III, Vanderbilt Initiative in Surgery and Engineering, Vanderbilt Univ. (United States)

Real-time 3D Fourier-domain optical coherence tomography guided microvascular anastomosis [8671-54]
Y. Huang, Johns Hopkins Univ. (United States); Z. Ibrahim, W. P. A. Lee, G. Brandacher, Johns Hopkins Univ. School of Medicine (United States); J. U. Kang, Johns Hopkins Univ. (United States)
8671 1I  **Towards cone-beam CT thermometry** [8671-55]
M. Li, N. Abi-Jaoudeh, A. Kapoor, National Institutes of Health (United States); S. Kadoury, Philips Research North America (United States) and Ecole Polytechnique de Montreal (Canada); S. Xu, National Institutes of Health (United States); N. Noordhoek, A. Radaelli, B. Carelsen, Philips Healthcare (Netherlands); B. J. Wood, National Institutes of Health (United States)

8671 1J  **Fast deformable registration for soft organs with large motion in HIFU treatment** [8671-56]
X. Huang, The Hospital for Sick Children (Canada) and Univ. of Toronto (Canada); A. Abdalbari, Univ. of Ontario Institute of Technology (Canada); S. Zaheer, T. Looi, The Hospital for Sick Children (Canada); J. Ren, Univ. of Ontario Institute of Technology (Canada); J. Drake, The Hospital for Sick Children (Canada) and Univ. of Toronto (Canada)

---

**POSTER SESSION**

8671 1K  **A graph-based approach for local and global panorama imaging in cystoscopy** [8671-3]
T. Bergen, T. Wittenberg, C. Münzenmayer, Fraunhofer-Institut für Integrierte Schaltungen (IIS) (Germany); C. C. G. Chen, Johns Hopkins Medical Institutions (United States); G. D. Hager, Johns Hopkins Univ. (United States)

8671 1L  **Experimental platform for intra-uterine needle placement procedures** [8671-41]
Y. Madjidi, Queen's Univ. (Canada) and Austrian Ctr. for Medical Innovation and Technology (Austria); T. Haidegger, Austrian Ctr. for Medical Innovation and Technology (Hungary) and Budapest Univ. of Technology and Economics (Hungary); W. Přítelek, Austrian Ctr. for Medical Innovation and Technology (Austria); D. Berger, C. Kirisits, Medizinische Univ. Wien (Austria); G. Kronreif, Austrian Ctr. for Medical Innovation and Technology (Austria); G. Fichtinger, Queen's Univ. (Canada)

8671 1M  **Patient-specific port placement for laparoscopic surgery using atlas-based registration** [8671-57]
A. Enquobahrie, V. Shivaprabhu, S. Aylward, J. Finet, Kitware, Inc. (United States); K. Cleary, Children's National Medical Ctr. (United States); R. Alterovitz, Univ. of North Carolina at Chapel Hill (United States)

8671 1N  **Patient-specific liver deformation modeling for tumor tracking** [8671-58]
Y.-T. Oh, Y. Hwang, J.-B. Kim, W.-C. Bang, J. D. K. Kim, C. Y. Kim, Samsung Advanced Institute of Technology (Korea, Republic of)

8671 1P  **3D deformable organ model based liver motion tracking in ultrasound videos** [8671-60]
J.-B. Kim, Y. Hwang, Y.-T. Oh, W.-C. Bang, H. Lee, J. D. K. Kim, C. Y. Kim, Samsung Advanced Institute of Technology (Korea, Republic of)

8671 1Q  **Real-time tumor tracking in B-mode images using respiratory signal and deformed liver models** [8671-61]
Y. Hwang, Y.-T. Oh, J.-B. Kim, W.-C. Bang, H. Lee, J. D. K. Kim, C. Y. Kim, Samsung Advanced Institute of Technology (Korea, Republic of)
Surface-based prostate registration with biomechanical regularization [8671-62]
W. J. M. van de Ven, Nijmegen Medical Ctr., Radboud Univ. (Netherlands); Y. Hu, Univ. College London (United Kingdom); J. O. Barentsz, N. Karssemeijer, Nijmegen Medical Ctr., Radboud Univ. (Netherlands); D. Barratt, Univ. College London (United Kingdom); H. J. Huisman, Nijmegen Medical Ctr., Radboud Univ. (Netherlands)

Transorbital target localization in the porcine model [8671-63]
M. P. DeLisi, L. A. Mawn, R. L. Galloway, Vanderbilt Univ. (United States)

Image guidance could aid performance of atraumatic cochlear implantation surgical techniques [8671-64]
J. H. Noble, Vanderbilt Univ. (United States); R. F. Labadie, G. B. Wanna, Vanderbilt Univ. Medical Ctr. (United States); B. M. Dawant, Vanderbilt Univ. (United States)

Robotically-adjustable microstereotactic frames for image-guided neurosurgery [8671-65]
L. B. Kratchman, J. M. Fitzpatrick, Vanderbilt Univ. (United States)

Marker detection evaluation by phantom and cadaver experiments for C-arm pose estimation pattern [8671-66]
T. Steger, M. Hoßbach, S. Wesarg, Fraunhofer-Institut für Graphische Datenverarbeitung (Germany)

Pose estimation quality assessment for intra-operative image guidance systems [8671-67]
A. Egli, G. Kleinszig, A. John, Siemens Medical Solutions GmbH (Germany); A. Fernandez, J. Cardelino, ICUC GmbH (Uruguay)

Intraoperative imaging for patient safety and QA: detection of intracranial hemorrhage using C-arm cone-beam CT [8671-68]
S. Schafer, A. Wang, Y. Otake, J. W. Stayman, W. Zbijewski, Johns Hopkins Univ. (United States); G. Kleinszig, Siemens Healthcare (Germany); X. Xia, G. L. Gallia, J. H. Siewerdsen, Johns Hopkins Univ. (United States)

Quantitative evaluation of multi-parametric MR imaging marker changes post-laser interstitial ablation therapy (LITT) for epilepsy [8671-69]
P. Tiwari, Case Western Reserve Univ. (United States); S. Danish, S. Wong, Univ. of Medicine and Dentistry of New Jersey (United States); A. Madabhushi, Case Western Reserve Univ. (United States)

Physiologically gated micro-beam radiation therapy using electronically controlled field emission x-ray source array [8671-70]
P. Chtcheprov, M. Hadsell, L. Burk, R. Ger, L. Zhang, H. Yuan, Y. Z. Lee, S. Chang, J. Lu, O. Zhou, The Univ. of North Carolina at Chapel Hill (United States)

Patient-specific model of a scoliotic torso for surgical planning [8671-71]
R. Harmouche, École Polytechnique de Montréal (Canada); F. Cheriet, École Polytechnique de Montréal (Canada) and Hôpital Ste-Justine, CHU Sainte-Justine (Canada); H. Labelle, Hôpital Ste-Justine, CHU Sainte-Justine (Canada); J. Danseau, École Polytechnique de Montréal (Canada) and Hôpital Ste-Justine, CHU Sainte-Justine (Canada)
Automatic generation of digital anthropomorphic phantoms from simulated MRI acquisitions [8671-74]
C. Lindsay, M. A. Gennert, Worcester Polytechnic Institute (United States); A. Könök, Univ. of Massachusetts Medical School (United States); P. K. Dasari, Worcester Polytechnic Institute (United States) and Univ. of Massachusetts Medical School (United States); M. A. King, Univ. of Massachusetts Medical School (United States)

Estimation of lung tissue incompressibility variation throughout respiration for tumor targeting in lung radiotherapy [8671-75]
Z. Shirzadi, The Univ. of Western Ontario (Canada); A. Samani, The Univ. of Western Ontario (Canada) and Robarts Research Institute (Canada)

Experimental assessment of error in an electromagnetically-tracked ultrasound-guided needle navigation system [8671-76]
I. Ayukawa, T. Ungi, K. Hashtrudi-Zaad, G. Fichtinger, P. Mousavi, Queen's Univ. (Canada)

Phantom-based comparison of the accuracy of point clouds extracted from stereo cameras and laser range scanner [8671-77]
A. N. Kumar, T. S. Pheiffer, A. L. Simpson, R. C. Thompson, M. I. Miga, B. M. Dawant, Vanderbilt Univ. (United States)

Accurate pose estimation using single marker single camera calibration system [8671-78]
S. Pati, O. Erat, L. Wang, Technische Univ. München (Germany); S. Weidert, E. Euler, Ludwig-Maximilians-Univ. München (Germany); N. Navab, P. Fallavollita, Technische Univ. München (Germany)

Template-based CTA X-ray angio rigid registration of coronary arteries in frequency domain [8671-79]
T. Aksoy, Sabanci Univ. (Turkey); S. Demirci, Technische Univ. München (Germany); M. Degertekin, Yeditepe Univ. Hospital (Turkey); N. Navab, Technische Univ. München (Germany); G. Unal, Sabanci Univ. (Turkey)

Interactive initialization for 2D/3D intra-operative registration using the Microsoft Kinect [8671-80]
R. H. Gong, Ö. Güler, Z. Yaniv, Sheikh Zayed Institute for Pediatric Surgical Innovation, Children's National Medical Ctr. (United States)

Detection of the spatial accuracy of an O-arm in the region of surgical interest [8671-81]
T. Koivukangas, Univ. of Oulu (Finland) and Lewel Group (Finland); J. P. A. Katsisko, Oulu Univ. Hospital (Finland); J. P. Koivukangsa, Oulu Univ. Hospital (Finland) and Univ. of Oulu (Finland)

Deformable image registration with content mismatch: a demons variant to account for added material and surgical devices in the target image [8671-82]
Fuzzy model-based body-wide anatomy recognition in medical images [8671-83]
J. K. Udupa, D. Odhner, Y. Tong, M. M. S. Matsumoto, Medical Image Processing Group, Univ. of Pennsylvania (United States); K. C. Ciesielski, Medical Image Processing Group, Univ. of Pennsylvania (United States) and West Virginia Univ. (United States); P. Vaideeswaran, V. Ciesielski, B. Saboury, L. Zhao, S. Mohammadianrasanani, D. A. Torigian, Medical Image Processing Group, Univ. of Pennsylvania (United States)

Optimal hierarchies for fuzzy object models [8671-84]
M. S. Matsumoto, J. K. Udupa, Medical Image Processing Group, Univ. of Pennsylvania (United States)

Segmentation of left atrial intracardiac ultrasound images for image guided cardiac ablation therapy [8671-85]
M. E. Rettmann, Mayo Clinic (United States); T. Stephens, Brigham Young Univ. (United States); D. R. Holmes III, C. Linte, D. L. Packer, R. A. Robb, Mayo Clinic (United States)

Automatic probe artifact detection in MRI-guided cryoablation [8671-86]
X. Liu, K. Tuncali, W. M. Wells III, G. P. Zientara, Brigham and Women’s Hospital (United States) and Harvard Medical School (United States)

Reconstruction method for curvilinear structures from two views [8671-87]
M. Hoffmann, Friedrich-Alexander-Universität Erlangen-Nürnberg (Germany); A. Brost, Stanford Univ. (United States); C. Jakob, M. Koch, Friedrich-Alexander-Universität Erlangen-Nürnberg (Germany); F. Bourier, K. Kurzdinm, Krankenhaus Barmherzige Brüder (Germany); J. Hornegger, Friedrich-Alexander-Universität Erlangen-Nürnberg (Germany) and Erlangen Graduate School in Advanced Optical Technologies (Germany); N. Strobel, Siemens AG (Germany)

Efficacy of a novel IGS system in atrial septal defect repair [8671-88]
F. N. Mefleh, Clemson Univ. (United States); G. H. Baker, D. M. Kwartowitz, Clemson Univ. (United States) and Medical Univ. of South Carolina (United States)

Accuracy evaluation of a 3D ultrasound-guided biopsy system [8671-89]
W. J. Wooten III, J. A. Nye, D. M. Schuster, Emory Univ. (United States); P. T. Nieh, V. A. Master, Emory Univ. School of Medicine (United States); J. R. Votaw, Emory Univ. (United States); B. Fei, Emory Univ. (United States) and Georgia Institute of Technology (United States)

Evaluation of three 3D US calibration methods [8671-90]
J. Hummel, Medizinische Univ. Wien (Austria) and Wilhelminenspital Wien (Austria); M. Kaar, R. Hoffmann, A. Bhatia, W. Birkfellner, M. Figl, Medizinische Univ. Wien (Austria)

Java multi-histogram volume rendering framework for medical images [8671-91]
J. Senseney, National Institutes of Health (United States) and Walter Reed National Military Medical Ctr. (United States); A. Bokinsky, Geometric Tools, Inc. (United States); R. Cheng, E. McCreedy, M. J. McAuliffe, National Institutes of Health (United States)

3-D examination of dental fractures with minimum user intervention [8671-92]
A. Souza, Carestream Health, Inc. (United States); A. Falcão, Univ. Estadual de Campinas (Brazil); L. Ray, Carestream Health, Inc. (United States)

Author Index
Conference Committee

Symposium Chairs

Nico Karssemeijer, Radboud University Nijmegen Medical Center (Netherlands)
Ehsan Samei, Duke University (United States)

Conference Chairs

David R. Holmes III, Mayo Clinic (United States)
Ziv R. Yaniv, Children's National Medical Center (United States)

Conference Program Committee

Purang Abolmaesumi, The University of British Columbia (Canada)
Wolfgang Birkfellner, Medizinische Universität Wien (Austria)
Alexandre X. Falcão, Universidade Estadual de Campinas (Brazil)
Baowei Fei, Emory University (United States)
Gabor Fichtinger, Queen’s University (Canada)
George J. Grevera, Saint Joseph’s University (United States)
Steven L. Hartmann, Medtronic Navigation (United States)
David R. Haynor, University of Washington (United States)
William E. Higgins, The Pennsylvania State University (United States)
Pierre Jannin, Université de Rennes 1 (France)
David M. Kwartowitz, Clemson University (United States)
Lena Maier-Hein, Deutsches Krebsforschungszentrum (Germany)
Michael Miga, Vanderbilt University (United States)
Kensaku Mori, Nagoya University (Japan)
Terry Peters, Robarts Research Institute (Canada)
Maryam E. Rettmann, Mayo Clinic (United States)
Frank Sauer, Siemens Corporate Research (United States)
Guy Shechter, Philips Medical Systems (United States)
Eric J. Seibel, University of Washington (United States)
Robert J. Webster III, Vanderbilt University (United States)
Jay B. West, Accuray, Inc. (United States)
Ivo Wolf, Fachhochschule Mannheim (Germany)
Kenneth H. Wong, Virginia Polytechnic Institute and State University (United States)

Session Chairs

1 Laparoscopy/Endoscopy/Bronchoscopy
   William E. Higgins, The Pennsylvania State University (United States)
   Kensaku Mori, Nagoya University (Japan)
2 Abdominal Procedures
Baowei Fei, Emory University (United States)
Ivo Wolf, Deutsches Krebsforschungszentrum (Germany)

3 Cardiothoracic and Radiotherapy Procedures
Terry Peters, Robarts Research Institute (Canada)
David M. Kwartowitz, Clemson University (United States)

4 Head and Neck Procedures
David R. Haynor, University of Washington (United States)
Lena Maier-Hein, Deutsches Krebsforschungszentrum (Germany)

5 Visualization and Segmentation
George J. Grevera, Saint Joseph's University (United States)
Alexandre X. Falcão, Universidade Estadual de Campinas (Brazil)

6 Simulation and Modeling
Michael I. Miga, Vanderbilt University (United States)
Kenneth H. Wong, Virginia Polytechnic Institute and State University (United States)

7 Keynote and Orthopedic Procedures
David R. Holmes III, Mayo Clinic (United States)
Ziv R. Yaniv, Children's National Medical Center (United States)

8 Registration and Tracking
Steven L. Hartmann, Medtronic Navigation (United States)
David R. Holmes III, Mayo Clinic (United States)

9 Robotics and Needle Procedures
Robert J. Webster III, Vanderbilt University (United States)
David M. Kwartowitz, Clemson University (United States)

10 Keynote and Digital Operating Room and Knowledge Integration in the OR: Joint Session Conferences 8671 and 8674
Frank Sauer, Siemens Corporate Research (United States)
William W. Boonn, The University of Pennsylvania Health System (United States)

11 Ultrasound Image Guidance: Joint Session with Conferences 8671 and 8675
Johan G. Bosch, Erasmus Universiteit Rotterdam (Netherlands)
Purang Abolmaesumi, The University of British Columbia (Canada)
Novel Imaging, Procedures, and Devices

Maryam E. Rettmann, Mayo Clinic (United States)

Guy Shechter, Philips Medical Systems (United States)
Introduction

We are pleased to introduce the 2013 edition of the SPIE Image-Guided Procedures, Robotic Interventions, and Modeling conference proceedings. As usual, the call for papers attracted outstanding submissions from all over the world. The quality of the research papers was excellent and the response from the community was positive. The conference continues to be a premier venue for our field, small enough to be highly collegial yet still showcasing the latest technical advances. The conference is an ideal setting for students to gain an understanding of the research community and interact with both peers and mentors.

Presented work was very translational with a significant focus on moving technology into the procedure room. Sessions focused on clinical/anatomical sites as well as technology development. Towards this end, Dr. Nassir Navab gave an outstanding keynote lecture emphasizing technology translation into the procedure room. Dr. Navab is a luminary in the field of image guidance as demonstrated by his extensive CV, active mentorship responsibilities in the community, leadership in several conferences, and success in commercialization of technology. Dr. Navab discussed the practical consideration for integrating technology into the surgical workflow. Moreover, he highlighted two technologies, Freehand SPECT and the Camera Augmented Mobile C-arm (CAMC), which are changing the way that surgeons work.

This year we participated in two joint sessions – the first with the Advanced PACS-based Imaging Informatics and Therapeutic Applications conference and the second with the Ultrasound Imaging, Tomography, and Therapy conference. In the PACS joint session, the keynote speaker, Dr. Heinz Lemke, reinforced the notion that technology needs to be integrated at all levels of the interventional process. At the infrastructure level, it is necessary to design robust networks and communication interfaces which move data around the procedure room. At the procedure level, data must be processed and presented in a manner which is both useful and intuitive to the interventionist. In the Ultrasound session, presenters demonstrated the direct application of ultrasound to interventional procedures. These sessions continue to demonstrate the multi-disciplinary/multi-application environment that we work in.

This year, we welcomed three new members to the conference committee – Lena Maier-Hein of Deutsches Krebsforschungszentrum (Germany), Kensaku Mori of Nagoya University (Japan), and Maryam Retlmann of Mayo Clinic (United States). Each of these scientists brings a unique perspective to the conference based on their own research experiences. A cursory review of the committee membership clearly demonstrates that our community is diverse – geographically, topically, and otherwise. Terry Peters of Robarts Research Institute (Canada) has
decided to “retire” from the committee. Dr. Peters has decades of contributions to our conference—both as an author and committee member. We thank Dr. Peters for his contributions to the committee and look forward to his continued participation in the conference as a mentor and author.

It would be impossible to run this conference without the outstanding support of the SPIE staff members, including the office staff, management, and editors. They make our job easier, ensure that deadlines are met, and allow us to focus on the technical content. Particular thanks goes to the SPIE staff for always being on top of every detail.

Finally, we would like to thank all the attendees who come to give talks, present posters, and actively participate in the meeting. We look forward to seeing you next year in San Diego and for many years to come!

David R. Holmes III
Ziv R. Yaniv
