Front Matter: Volume 9827
The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-756X (electronic)

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.
Contents

v  Authors  

vii  Conference Committee

OPTICALLY COHERENT MARITIME MEASUREMENTS

9827 02  Integration of a laser doppler vibrometer and adaptive optics system for acoustic-optical detection in the presence of random water wave distortions [9827-1]

9827 03  Demonstration of adaptive optics for mitigating laser propagation through a random air-water interface [9827-2]

9827 04  Statistical characterization of the optical interaction at a supercavitating interface [9827-3]

9827 05  Measurements of optical underwater turbulence under controlled conditions [9827-4]

9827 06  Dynamic control of coherent orbital-angular-momentum beams in turbid environments [9827-5]

9827 07  The influence of underwater turbulence on optical phase measurements [9827-6]

IMAGING OF THE OCEAN

9827 08  Remotely operated compact underwater temporally encoded imager: CUTEI [9827-7]

9827 09  Experimental study of a DMD based compressive line sensing imaging system in the turbulence environment [9827-8]

9827 0A  Wide bandwidth optical signals for high range resolution measurements in water [9827-9]

9827 0B  Enhanced oil spill detection sensors in low-light environments [9827-10]

9827 0C  Automated sea floor extraction from underwater video [9827-11]

UNDERWATER COMMUNICATION AND TURBULENCE

9827 0D  Probability density function analysis for optical turbulence with applications to underwater communications systems [9827-12]

9827 0F  Velocity fields and optical turbulence near the boundary in a strongly convective laboratory flow [9827-14]

9827 0G  Blue-light digital communication in underwater environments utilizing orbital angular momentum [9827-15]
Airborne Lidar Bathymetry (ALB) waveform analysis for bottom return characteristics [9827-16]

An underwater chaotic lidar sensor based on synchronized blue laser diodes [9827-17]

Independent component analysis for underwater lidar clutter rejection [9827-18]

Near real time SST retrievals from Himawari-8 at NOAA using ACSPO system [9827-21]

Exploring new bands in modified multichannel regression SST algorithms for the next-generation infrared sensors at NOAA [9827-23]

Sensitivity of modeled ocean heat content to errors in short wave radiation and its attenuation with depth [9827-28]

Chlorophyll fluorescence and the polarized underwater light field: comparison of vector radiative transfer simulations and multi-angular hyperspectral polarization field measurements [9827-30]

Estimating Terra MODIS polarization effect using ocean data [9827-31]

Structural characterization of wind-sheared turbulent flow using self-organized mapping [9827-33]

Impact of MODIS SWIR band calibration improvements on Level-3 atmospheric products [9827-34]

Surface biomass flux across the coastal Mississippi shelf [9827-35]

Diurnal changes in ocean color in coastal waters [9827-37]
Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Proc. of SPIE Vol. 9827  982701-5
Conference Committee

Symposium Chair
  David A. Logan, BAE Systems (United States)

Symposium Co-chair
  Donald A. Reago Jr., U.S. Army Night Vision & Electronic Sensors Directorate (United States)

Conference Chairs
  Weilin W. Hou, U.S. Naval Research Laboratory (United States)
  Robert A. Arnone, The University of Southern Mississippi (United States)

Conference Program Committee
  Samir Ahmed, The City College of New York (United States)
  Brandon Cochenour, Naval Air Warfare Center Aircraft Division (United States)
  Alexander Ignatov, NOAA National Environmental Satellite, Data, and Information Service (United States)
  Linda J. Mullen, Naval Air Systems Command (United States)

Session Chairs
  Opening Remarks
    Weilin W. Hou, U.S. Naval Research Laboratory (United States)
    Robert A. Arnone, The University of Southern Mississippi (United States)
  1 Optically Coherent Maritime Measurements
    Linda Mullen, Naval Air Systems Command (United States)
  2 Imaging of the Ocean
    Weilin W. Hou, U.S. Naval Research Laboratory (United States)
  3 Underwater Communication and Turbulence
    Brandon Cochenour, Naval Air Warfare Center Aircraft Division (United States)
  4 Ocean Lidar
    Brandon Cochenour, Naval Air Warfare Center Aircraft Division (United States)
    Linda Mullen, Naval Air Systems Command (United States)
5 Remote Sensing of Sea Surface Temperature I
Robert A. Arnone, The University of Southern Mississippi (United States)
Alexander Ignatov, NOAA National Environmental Satellite, Data, and Information Service (United States)

6 Remote Sensing of Sea Surface Temperature II
Alexander Ignatov, NOAA National Environmental Satellite, Data, and Information Service (United States)
Robert A. Arnone, The University of Southern Mississippi (United States)

7 SST, Ocean Color, and Modeling of the Ocean
Robert A. Arnone, The University of Southern Mississippi (United States)
Samir Ahmed, The City College of New York (United States)
