xxiii Conference Committee
xxv In Memoriam: Sam Dwyer (1932–2008)

SESSION 1 KEYNOTE AND SMALL ANIMAL IMAGING

6913 03 Utility of a prototype liposomal contrast agent for x-ray imaging of breast cancer: a proof of concept using micro-CT in small animals [6913-02]
C. T. Badea, E. Samei, K. Ghaghada, R. Saunders, H. Yuan, Y. Qi, L. W. Hedlund, S. Mukundan, Duke Univ. Medical Ctr. (USA)

6913 04 Respiratory-gated micro-CT using a carbon nanotube based micro-focus field emission x-ray source [6913-03]
G. Cao, Y. Z. Lee, Z. Liu, R. Rajaram, R. Peng, X. Calderon-Colon, L. An, P. Wang, T. Phan, Univ. of North Carolina, Chapel Hill (USA); D. Lalush, North Carolina State Univ. (USA); J. Lu, O. Zhou, Univ. of North Carolina, Chapel Hill (USA)

SESSION 2 INNOVATIVE IMAGING

6913 05 HYPR: constrained reconstruction for enhanced SNR in dynamic medical imaging [6913-04]

6913 06 Technical feasibility of breast cancer screening using ultrasound propagation velocity [6913-05]
K. Ma, A. Fenster, Robarts Research Institute (Canada) and The Univ. of Western Ontario (Canada)

6913 07 Experimental proof of an idea for a CT-scanner with dose reduction potential [6913-06]
H. de las Heras, O. Tischenko, German Research Ctr. for Environmental Health (Germany); B. Renger, Univ. Hospital Rechts der Isar, Technical Univ. of Munich (Germany); Y. Xu, Univ. of Oregon (USA); C. Hoeschen, German Research Ctr. for Environmental Health (Germany)

6913 08 Imaging with multi-prism x-ray lenses [6913-07]
E. Fredenberg, B. Cederström, AlbaNova Univ. Ctr. (Sweden); M. Åslund, Sectra Mamea AB (Sweden); P. Nillius, AlbaNova Univ. Ctr. (Sweden); M. Lundqvist, Sectra Mamea AB (Sweden); M. Danielsson, AlbaNova Univ. Ctr. (Sweden)
GEANT4 simulation of NSECT for detection of iron overload in the liver [6913-08]
A. J. Kapadia, B. P. Harrawood, Duke Univ. Medical Ctr. (USA); G. D. Tourassi, Duke Univ. Medical Ctr. (USA) and Duke Univ. (USA)

Electronic portal imaging using Cherenkov radiation [6913-09]
I. C. Silva, Sunnybrook Health Sciences Ctr., Univ. of Toronto (Canada); G. Pang, Sunnybrook Health Sciences Ctr., Univ. of Toronto (Canada) and Odette Cancer Ctr., Univ. of Toronto (Canada)

SESSION 3 OPTICAL AND MR IMAGING

Photon migration simulator for fluorescence tomography [6913-10]
C. Pardo-Martín, T. Pengo, A. Muñoz-Barrutia, C. Ortiz-de-Solorzano, Univ. of Navarra (Spain)

Computationally efficient perturbative forward modeling for 3D multispectral bioluminescence and fluorescence tomography [6913-11]
J. Dutta, S. Ahn, Univ. of Southern California (USA); C. Li, A. J. Chaudhari, S. R. Cherry, Univ. of California, Davis (USA); R. M. Leahy, Univ. of Southern California (USA)

3D multispectral light propagation model for subcutaneous veins imaging [6913-12]
V. Paquit, Oak Ridge National Lab. (USA) and Le2i, Univ. of Burgundy (France); J. R. Price, Oak Ridge National Lab. (USA); F. Mériaudeau, Le2i, Univ. of Burgundy (France); K. W. Tobin, Jr., Oak Ridge National Lab. (USA)

Image reconstruction from sparse data samples in MRI accounting for phase roll [6913-13]
S. J. LaRoque, E. Y. Sidky, G. S. Karczmar, X. Pan, The Univ. of Chicago (USA)

A fixed point method for homotopic $\ell_0$-minimization with application to MR image recovery [6913-14]
J. D. Trzasko, A. Manduca, Mayo Clinic (USA)

Retrospective breathing motion compensation for MRI with continuously moving table [6913-15]
M. Honal, S. Bauer, S. Huff, Univ. Hospital Freiburg (Germany); S. Kannengiesser, Siemens Medical Solutions (Germany); J. Leupold, U. Ludwig, Univ. Hospital Freiburg (Germany)

Statistical properties of spin noise in MRI [6913-16]
T. Lei, H. K. Song, F. W. Wehrli, T. P. L. Roberts, Univ. of Pennsylvania (USA) and Children’s Hospital of Philadelphia (USA)

SESSION 4 X-RAY DETECTORS I

Exploration of the potential performance of polycrystalline silicon-based active matrix flat panel imagers incorporating active pixel sensor architectures [6913-17]
L. E. Antonuk, Y. El-Mohri, Q. Zhao, M. Koniczek, J. McDonald, M. Yeakey, Y. Wang, M. Behravan, Univ. of Michigan (USA); R. A. Street, J. Lu, Palo Alto Research Ctr. (USA)
### SESSION 5  X-RAY DETECTORS II

**6913 0J**  
**Advances in the development of solid state photomultipliers for medical imaging** [6913-18]  
E. Levin, E. Shelegeda, V. E. Shubin, D. A. Shushakov, C. Sitarsky, S. Vinogradov, Amplification Technologies, Inc. (USA)

**6913 0K**  
**The solid-state x-ray image intensifier (SSXII): an EMCCD-based x-ray detector** [6913-19]  
A. Kuhls-Gilcrist, G. Yadava, V. Patel, A. Jain, D. R. Bednarek, S. Rudin, Univ. at Buffalo, SUNY (USA)

**6913 0L**  
**Parameter investigation and first results from a digital flat panel detector with forward bias capability** [6913-20]  
J. Starman, Stanford Univ. (USA); C. Tognina, G. Virshup, J. Star-lack, I. Mollov, Varian Medical Systems (USA); R. Fahrig, Stanford Univ. (USA)

**6913 0M**  
**An indirect flat-panel detector with avalanche gain for low dose x-ray imaging: SAPHIRE (scintillator avalanche photoconductor with high resolution emitter readout)** [6913-21]  
W. Zhao, D. Li, State Univ. of New York at Stony Brook (USA); J. A. Rowlands, Sunnybrook and Women's Health Sciences Ctr. (Canada); N. Egami, Y. Takiguchi, M. Nanba, Y. Honda, Y. Ohkawa, M. Kubota, K. Tanioka, Japan Broadcasting Corp. (Japan); K. Suzuki, T. Kawai, Hamamatsu Photonics K.K. (Japan)

<table>

<tr>
<th>Session 5</th>
<th>X-RAY DETECTORS II</th>
</tr>
</thead>
</table>
| **6913 0N** | Detective quantum efficiency of an energy resolving photon counting detector [6913-22]  
J. E. Tkaczyk, General Electric Research (USA); S. Basu, General Electric Security (USA); D. McDevitt, W. Li, Y. Du, General Electric Research (USA) |
| **6913 0O** | An efficient depth- and energy-dependent Monte Carlo model for columnar CsI detectors [6913-23]  
I. S. Kyprianou, NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems (USA); G. Brackman, Marquette Univ. (USA); K. J. Myers, NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems (USA); A. Badal, Univ. Politecnica de Catalunya (Spain) and NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems (USA); A. Badano, NIBIB/CDRH Lab. for the Assessment of Medical Imaging Systems (USA) |
| **6913 0P** | CIX: a detector for spectrally enhanced x-ray imaging by simultaneous counting and integrating [6913-24]  
H. Krüger, J. Fink, E. Kraft, N. Wermes, Univ. of Bonn (Germany); P. Fischer, I. Peric, Univ. of Mannheim (Germany); C. Herrmann, M. Overdick, W. Rütten, Philips Research Europe (Germany) |
| **6913 0Q** | Characterization of the new co-doped CsI microcolumnar films for high-speed radiographic imaging [6913-25]  
S. C. Thacker, V. Gaysinskiy, L. E. Ovechkina, S. R. Miller, V. V. Nagarkar, Radiation Monitoring Devices (USA); C. Brecher, A. Lempicki, ALEM Associates (USA); R. H. Bartram, Univ. of Connecticut (USA) |
| **6913 0R** | Recent developments in scintillating fiber detection systems in radiation therapy [6913-26]  
A. S. Beddar, L. Archambault, T. M. Briere, Univ. of Texas, M.D. Anderson Cancer Ctr. (USA); F. Lacroix, Ctr. Hospitalier de l'Univ. de Montréal (Canada); L. Gingras, L. Beaulieu, Ctr. Hospitalier Univ. de Quebec (Canada) |
Photon counting readout pixel array in 0.18-µm CMOS technology for on-line gamma-ray imaging of $^{103}$palladium seeds for permanent breast seed implant (PBSI) brachytherapy [6913-27]

A. H. Goldan, K. S. Karim, Univ. of Waterloo (Canada); A. Reznik, C. B. Caldwell, J. A. Rowlands, Sunnybrook Health Sciences Ctr. (Canada)

SESSION 6 PERFORMANCE ASSESSMENT AND PHANTOMS

Toward a full-reference information-theoretic quality assessment method for x-ray images [6913-28]

C. Papalazarou, Univ. of Technology Eindhoven (Netherlands); R. M. Snoeren, Philips Medical Systems (Netherlands); F. M. J. Willems, Univ. of Technology Eindhoven (Netherlands); P. H. N. de Wijt, Univ. of Technology Eindhoven (Netherlands) and LogicaCMG (Netherlands); H. Kroon, P. Rongen, Philips Medical Systems (Netherlands)

Generalized objective performance assessment of a new high-sensitivity microangiographic fluoroscopic (HSMAF) imaging system [6913-29]

G. K. Yadava, S. Rudin, A. T. Kuhls-Gilcrist, D. R. Bednarek, Toshiba Stroke Research Ctr., Univ. at Buffalo, SUNY (USA)

Physical characterization of digital radiological images by use of transmitted information metric [6913-30]

E. Matsuyama, D.-Y. Tsai, Y. Lee, M. Sekiya, Niigata Univ. (Japan); K. Kojima, Univ. of Hamamatsu (Japan)

A perfusion phantom for quantitative medical imaging [6913-31]

B. Ebrahimi, S. D. Swanson, B. Mosadegh, T. E. Chupp, Univ. of Michigan, Ann Arbor (USA)

Voxel models representing the male and female ICRP reference adult: a dosimetric tool for medical imaging [6913-32]

M. Zankl, H. Schlattl, J. Becker, N. Petoussi-Henss, C. Hoeschen, Helmholtz Zentrum München, German Research Ctr. for Environmental Health GmbH (Germany)

SESSION 7 DUAL ENERGY

Optimization of dual energy contrast enhanced breast tomosynthesis for improved mammographic lesion detection and diagnosis [6913-33]

R. Saunders, Jr., E. Samei, C. Badea, H. Yuan, K. Ghaghada, Y. Qi, L. W. Hedlund, S. Mukundan, Duke Univ. Medical Ctr. (USA)

Optimization of beam parameters and iodine quantification in dual-energy contrast enhanced digital breast tomosynthesis [6913-34]

S. Puong, GE Healthcare (France) and Univ. Paris XI (France); X. Bouchevreau, GE Healthcare (France); N. Duchateau, Institut d’Optique (France); R. Iordache, S. Muller, GE Healthcare (France)
6913 10  **Contrast-enhanced dual-energy subtraction imaging using electronic spectrum-splitting and multi-prism x-ray lenses** [6913-35]
E. Fredenberg, B. Cederström, Royal Institute of Technology (Sweden); M. Lundqvist, Sectra Mamea AB (Sweden); C. Ribbing, Uppsala Univ. (Sweden); M. Åslund, Sectra Mamea AB (Sweden); F. Diekmann, Charité - Univ. Hospital (Germany); R. Nishikawa, Univ. of Chicago (USA); M. Danielsson, Royal Institute of Technology (Sweden)

6913 11  **NEQ and task in dual-energy imaging: from cascaded systems analysis to human observer performance (Best Student Paper Award)** [6913-36]
S. Richard, Univ. of Toronto (Canada); J. H. Siewerdsen, Univ. of Toronto (Canada) and Ontario Cancer Institute, Princess Margaret Hospital (Canada); D. J. Tward, Ontario Cancer Institute, Princess Margaret Hospital (Canada)

6913 12  **Low-dose dual-energy computed tomography for PET attenuation correction with statistical sinogram restoration** [6913-37]
J. Noh, J. A. Fessler, Univ. of Michigan (USA); P. E. Kinahan, Univ. of Washington (USA)

6913 13  **Analysis of fast kV-switching in dual energy CT using a pre-reconstruction decomposition technique** [6913-38]
Y. Zou, M. D. Silver, Toshiba Medical Research Institute USA (USA)

**SESSION 8  BREAST TISSUE MODELING AND ESTIMATION**

6913 14  **Three-dimensional computer generated breast phantom based on empirical data** [6913-39]
C. M. Li, W. P. Segars, J. Y. Lo, Duke Univ. (USA) and Duke Univ. Medical Ctr. (USA); A. I. Veress, Univ. of Utah (USA); J. M. Boone, Univ. of California, Davis Medical Ctr. (USA); J. T. Dobbins III, Duke Univ. (USA) and Duke Univ. Medical Ctr. (USA)

6913 15  **Using mastectomy specimens to develop breast models for breast tomosynthesis and CT breast imaging** [6913-40]
J. M. O'Connor, Univ. of Massachusetts, Lowell (USA); M. Das, Univ. of Massachusetts Medical School (USA); C. Didier, M. Mah'D, Univ. of Massachusetts, Lowell (USA); S. J. Glick, Univ. of Massachusetts Medical School (USA)

6913 17  **Simulation of mammograms and tomosynthesis imaging with cone beam breast CT images** [6913-42]
T. Han, C. C. Shaw, L. Chen, C.-J. Lai, X. Liu, T. Wang, The Univ. of Texas M.D. Anderson Cancer Ctr. (USA)

6913 18  **Breast percent density estimation from 3D reconstructed digital breast tomosynthesis images** [6913-43]
P. R. Bakic, D. Kontos, A.-K. Carton, A. D. A. Maidment, Univ. of Pennsylvania (USA)

**SESSION 9  BREAST IMAGING**

6913 19  **Evaluation of a variable dose acquisition methodology for breast tomosynthesis** [6913-44]
M. Das, H. Gifford, Univ. of Massachusetts Medical School (USA); M. O'Connor, Univ. of Massachusetts Medical School (USA) and Univ. of Massachusetts, Lowell (USA); S. Glick, Univ. of Massachusetts Medical School (USA)
6913 1A  Stationary digital breast tomosynthesis system with a multi-beam field emission x-ray source array [6913-45]
G. Yang, R. Rajaram, G. Cao, S. Sultana, Z. Liu, Univ. of North Carolina at Chapel Hill (USA); D. Lalush, Univ. of North Carolina at Chapel Hill (USA) and North Carolina State Univ. (USA); J. Lu, O. Zhou, Univ. of North Carolina at Chapel Hill (USA)

6913 1B  Imaging CDMAM phantom with tomosynthesis [6913-46]
B. Ren, A. Smith, C. Ruth, Z. Jing, Hologic Inc. (USA)

6913 1C  Evaluation of software for reading images of the CDMAM test object to assess digital mammography systems [6913-47]
K. C. Young, A. Alsager, J. M. Oduko, Royal Surrey County Hospital (United Kingdom); H. Bosmans, B. Verbrugge, UZ Gasthuisberg (Belgium); T. Geertse, R. van Engen, Radboud Univ. Nijmegen Medical Ctr. (Netherlands)

6913 1D  Temporal change analysis for improved tumor detection in dedicated CT breast imaging using affine and free-form deformation [6913-48]
J. Dey, J. M. O'Connor, Y. Chen, S. J. Glick, Univ. of Massachusetts Medical School (USA)

6913 1E  Feasibility of dual-resolution cone beam breast CT: a simulation study [6913-49]
L. Chen, C. C. Shaw, C.-J. Lai, T. Han, X. Liu, T. Wang, Univ. of Texas M.D. Anderson Cancer Ctr. (USA)

SESSION 10  CARDIAC IMAGING

6913 1G  Cardiac C-arm CT: image-based gating [6913-51]
C. Rohkohl, M. Prümmer, Univ. Erlangen-Nuremberg (Germany); R. Fahrig, Stanford Univ. (USA); G. Lauritsch, Siemens AG (Germany); J. Hornegger, Univ. Erlangen-Nuremberg (Germany)

6913 1H  Cardiac imaging in diagnostic VCT using multi-sector data acquisition and image reconstruction: step-and-shoot scan vs. helical scan [6913-52]
X. Tang, J. Hsieh, J. L. Seamans, F. Dong, D. Okerlund, GE Healthcare (USA)

6913 1I  Frame-by-frame 3D catheter tracking methods for an inverse geometry cardiac interventional system [6913-53]
M. A. Speidel, Univ. of Wisconsin, Madison (USA); A. P. Lowell, J. A. Heanue, Triple Ring Technologies, Inc. (USA); M. S. Van Lysel, Univ. of Wisconsin, Madison (USA)

6913 1J  CT blurring induced bias of quantitative in-stent restenosis analyses [6913-54]
H. A. Marquering, B. C. Stoel, J. Dijkstra, Leiden Univ. Medical Ctr. (Netherlands); K. Geleijns, Leiden Univ. (Netherlands); M. Persoon, Bio-Imaging Technologies, Inc. (Netherlands); J. W. Jukema, Leiden Univ. Medical Ctr. (Netherlands); G. J. Streekstra, Academic Medical Ctr. (Netherlands); J. H. C. Reiber, Leiden Univ. Medical Ctr. (Netherlands)
SESSION 11 CT APPLICATIONS

6913 1K Dependence of CT attenuation values on scanner type using In Vivo measurements [6913-55]
M. Prasad, A. Meza, H. J. Kim, M. S. Brown, F. Abtin, J. G. Goldin, M. F. McNitt-Gray, David Geffen School of Medicine, Univ. of California, Los Angeles (USA)

6913 1L Toward assessing the diagnostic influence of dose reduction in pediatric CT: a study based on simulated lung nodules [6913-56]
X. Li, E. Samei, D. M. DeLong, R. P. Jones, Duke Univ. (USA); J. G. Colsher, GE Healthcare (USA); D. P. Frush, Duke Univ. (USA)

6913 1M Noise properties of low-dose x-ray CT sinogram data in radon space [6913-120]
J. Wang, SUNY (USA); H. Lu, Fourth Military Medical Univ. (China); Z. Liang, D. Eremina, G. Zhang, S. Wang, J. Chen, J. Manzione, SUNY (USA)

6913 1N Measurement of small lesions near metallic implants with mega-voltage cone beam CT [6913-58]
V. Grigorescu, S. Prevrhal, J. Pouliot, Univ. of California, San Francisco (USA)

6913 1O Measurement of three-dimensional point spread functions in multidetector-row CT [6913-59]
Y. Kawata, Univ. of Tokushima (Japan); Y. Nakaya, Shizuoka Cancer Ctr. Hospital (Japan); N. Niki, Univ. of Tokushima (Japan); H. Ohmatsu, National Cancer Ctr. Hospital East (Japan); K. Eguchi, Teikyo Univ. (Japan); M. Kaneko, National Cancer Ctr. Hospital (Japan); N. Moriyama, National Cancer Ctr. (Japan)

6913 1P Correlation identification between internal/external motion signals [6913-60]
H. Wu, Indiana Univ.-Purdue Univ. Indianapolis (USA); Q. Zhao, Purdue Univ. (USA); R. Berbeco, Dana-Farber/Brigham and Women’s Cancer Ctr. and Harvard Medical School (USA); S. Nishioka, NTT East-Japan Sapporo Hospital (Japan); H. Shirato, Hokkaido Univ. Graduate School of Medicine (Japan); S. B. Jiang, Univ. of California, San Diego (USA)

Part Two

SESSION 12 CT SYSTEM MODELS

6913 1Q Analysis of image noise in 3D cone-beam CT: spatial and Fourier domain approaches under conditions of varying stationarity [6913-61]
A. R. Pineda, California State Univ., Fullerton (USA); J. H. Siewersden, Princess Margaret Hospital (Canada) and Univ. of Toronto (Canada); D. J. Tward, Princess Margaret Hospital (Canada)

6913 1R Spectral analysis of scattered radiation in CT [6913-62]
K. J. Engel, C. Bäumer, J. Wiegert, G. Zeitler, Philips Research Europe (Germany)

6913 1S Cascaded systems analysis of the 3D NEQ for cone-beam CT and tomosynthesis [6913-63]
D. J. Tward, Princess Margaret Hospital (Canada); J. H. Siewersden, Princess Margaret Hospital (Canada) and Univ. of Toronto (Canada); R. A. Fahrig, Stanford Univ. (USA); A. R. Pineda, California State Univ., Fullerton (USA)
**SESSION 13 SYSTEMS AND CORRECTIONS**

**6913 1T** Hadamard multiplexing radiography based on carbon nanotube field emission multi-pixel x-ray technology [6913-64]
J. Zhang, G. Yang, S. Chang, J. P. Lu, O. Zhou, Univ. of North Carolina, Chapel Hill (USA)

**6913 1U** Propagation of quantum noise in multiplexed x-ray imaging [6913-65]
B. De Man, GE Global Research (USA); N. J. Pelc, Stanford Univ. (USA); C. Dumoulin, GE Global Research (USA); T. Bernstein, GE Healthcare (USA)

**SESSION 14 TOMOGRAPHIC RECONSTRUCTION**

**6913 21** Exact and approximate cone-beam reconstruction algorithms for C-arm based cone-beam CT using a two-concentric-arc source trajectory [6913-72]
T. Zhuang, J. Zambelli, B. Nett, S. Leng, G.-H. Chen, Univ. of Wisconsin, Madison (USA)

**6913 22** 3D iterative full and half scan reconstruction in CT architectures with distributed sources [6913-73]
M. Iatrou, B. De Man, GE Research (USA); D. Beque, GE Research (Germany); Z. Yin, K. Khare, T. M. Benson, GE Research (USA)

**6913 23** A Fourier rebinning algorithm for cone beam CT [6913-74]
S. R. Mazin, N. J. Pelc, Stanford Univ. (USA)
A preliminary study of intensity-weighted ROI imaging in cone-beam CT

S. Cho, E. Pearson, D. Xia, X. Han, C. A. Pelizzari, X. Pan, Univ. of Chicago (USA)

An acquisition and image reconstruction scheme for reduced x-ray exposure dynamic 3D CTA

M. Supanich, H. Rowley, A. Turk, M. Speidel, K. Pulfer, Univ. of Wisconsin, Madison (USA); J. Hsieh, GE Healthcare (USA); G. Chen, C. Mistretta, Univ. of Wisconsin, Madison (USA)

Region-of-interest image reconstruction in x-ray differential phase-contrast tomography

M. A. Anastasio, Illinois Institute of Technology (USA); D. Xia, X. Pan, The Univ. of Chicago (USA)

Practical iterative image reconstruction in digital breast tomosynthesis by non-convex TpV optimization

E. Y. Sidky, I. Reiser, R. M. Nishikawa, X. Pan, The Univ. of Chicago (USA); R. Chartrand, Los Alamos National Lab. (USA); D. B. Kopans, R. H. Moore, Massachusetts General Hospital (USA)

Sinogram smoothing with bilateral filtering for low-dose CT

L. Yu, A. Manduca, J. D. Trzasko, N. Khaylova, J. M. Kofler, C. M. McCollough, J. G. Fletcher, Mayo Clinic College of Medicine (USA)

Tomosynthesis with source positions distributed over a surface

D. Xia, S. Cho, J. Bian, E. Y. Sidky, C. A. Pelizzari, X. Pan, The Univ. of Chicago (USA)

Iterative scatter correction based on artifact assessment

J. Wiegert, S. Hohmann, M. Bertram, Philips Research Europe (Germany)

A preliminary investigation of using prior information for potentially improving image reconstruction in few-view CT

S. Cho, E. Y. Sidky, J. Bian, C. A. Pelizzari, X. Pan, Univ. of Chicago (USA)

Tomosynthesis via total variation minimization reconstruction and prior image constrained compressed sensing (PICCS) on a C-arm system (Honorable Mention Poster Award)

B. Nett, J. Tang, S. Leng, G. Chen, Univ. of Wisconsin (USA)

Efficient extended field of view (eFOV) reconstruction techniques for multi-slice helical CT

H. Bruder, C. Suess, K. Stierstorfer, Siemens AG (Germany)
6913 2F  **Expectation maximization SPECT reconstruction with a content-adaptive singularity-based mesh-domain image model** [6913-86]
Y. Lu, H. Ye, Y. Xu, X. Hu, L. Vogelsang, L. Shen, Syracuse Univ. (USA); D. Feiglin, SUNY Upstate Medical Univ. (USA) and Syracuse Univ. (USA); E. Lipson, Syracuse Univ. (USA) and SUNY Upstate Medical Univ. (USA); A. Krol, SUNY Upstate Medical Univ. (USA) and Syracuse Univ. (USA)

6913 2G  **Chord-based image reconstruction from clinical projection data** [6913-87]
M. King, D. Xia, X. Pan, M. Vannier, The Univ. of Chicago (USA); T. Köhler, Philips Research Europe (Germany); P. L. Riviére, E. Sidky, M. Giger, The Univ. of Chicago (USA)

6913 2H  **Electronic noise compensation in iterative x-ray CT reconstruction** [6913-88]
J. Xu, B. M. W. Tsui, Johns Hopkins Univ. (USA)

6913 2I  **A preliminary investigation of ROI-image reconstruction with the rebinned BPF algorithm** [6913-89]
J. Bian, D. Xia, The Univ. of Chicago (USA); L. Yu, Mayo Clinic (USA); E. Y. Sidky, X. Pan, The Univ. of Chicago (USA)

6913 2J  **An FBP image reconstruction algorithm for x-ray differential phase contrast CT** [6913-90]
Z. Qi, G.-H. Chen, Univ. of Wisconsin, Madison (USA)

6913 2K  **Development of a fully 3D system model in iterative expectation-maximization reconstruction for cone-beam SPECT** [6913-91]
H. Ye, L. Vogelsang, Syracuse Univ. (USA); D. H. Feiglin, SUNY Upstate Medical Univ. (USA); E. D. Lipson, Syracuse Univ. (USA) and SUNY Upstate Medical Univ. (USA); A. Krol, SUNY Upstate Medical Univ. (USA) and Syracuse Univ. (USA)

6913 2L  **Mesh model 2D reconstruction operator for SPECT** [6913-92]
R. D. Gonzalo, J. G. Brankov, Illinois Institute of Technology (USA)

6913 2M  **Generic iterative reconstruction of multi-pinhole SPECT** [6913-93]
W. J. Ryder, M. P. Brennan, A. J. Sinusas, Y.-H. Liu, Yale Univ. School of Medicine (USA)

6913 2N  **A blob-based tomographic reconstruction of 3D coronary trees from rotational x-ray angiography** [6913-94]
J. Zhou, A. Bousse, G. Yang, Southeast Univ. (China) and INSERM (France) and Univ. de Rennes 1 (France) and Ctr. de Recherche en Information Biomédicale Sino-français (France); J.-J. Bellanger, INSERM (France) and Univ. de Rennes 1 (France) and Ctr. de Recherche en Information Biomédicale Sino-français (France); L. Luo, Southeast Univ. (China) and Ctr. de Recherche en Information Biomédicale Sino-français (France); C. Tournouin, J.-L. Coatrueux, INSERM (France) and Univ. de Rennes 1 (France) and Ctr. de Recherche en Information Biomédicale Sino-français (France)

6913 2O  **A hardware projector/backproejctor pair for 3D PET reconstruction** [6913-95]
N. Gac, S. Mancini, M. Desvignes, F. Deboissieu, Gipsa-lab, INPG (France); A. Reilhac, CERMEP (France)

6913 2P  **Automatic local thresholding of tomographic reconstructions based on the projection data** [6913-96]
K. J. Batenburg, J. Sijbers, Univ. of Antwerp (Belgium)
Cone-beam reconstruction using retrieved phase projections of in-line holography for breast imaging [6913-97]
W. Cai, R. Ning, Univ. of Rochester (USA)

SPECT reconstruction on the GPU [6913-98]
C. Vetter, Siemens Corporate Research (USA); R. Westermann, Technische Univ. München (Germany)

Applying Mojette discrete radon transforms to classical tomographic data [6913-99]
H. Fayad, LATIM, INSERM, CHU Morvan (France) and IRCCyN, Ecole Polytechnique Univ. of Nantes (France); J. P. Guédon, IRCCyN, Ecole Polytechnique Univ. of Nantes (France); I. Svalbe, Monash Univ. (Australia); Y. Bizais, LATIM, INSERM, CHU Morvan (France); N. Normand, IRCCyN, Ecole Polytechnique Univ. of Nantes (France)

Accelerate helical cone-beam CT with graphics hardware [6913-100]
W. Bi, Z. Chen, L. Zhang, Y. Xing, Tsinghua Univ. (China)

A projection-driven pre-correction technique for iterative reconstruction of helical cone-beam cardiac CT images [6913-101]
S. Do, Massachusetts General Hospital (USA); Z. Liang, W. C. Karl, Boston Univ. (USA); T. Brady, H. Pien, Massachusetts General Hospital (USA)

Hardware accelerated C-arm CT and fluoroscopy: a pilot study [6913-102]
D. Riabkov, T. Brown, A. Cheryauka, A. Tokhtuev, GE Healthcare-Surgery (USA)

A study on projection distribution of few-view reconstruction with total variation constraint [6913-103]
L. Zhang, X. Duan, Y. Xing, Z. Chen, J. Cheng, Tsinghua Univ. (China)

PDE regularization for Bayesian reconstruction of emission tomography [6913-104]
Z. Wang, L. Zhang, Y. Xing, Z. Zhao, Tsinghua Univ. (China)

Truncation artifact and boundary artifact reduction in breast tomosynthesis reconstruction [6913-105]
Y. Zhang, H.-P. Chan, Y.-T. Wu, B. Sahiner, C. Zhou, J. Wei, J. Ge, L. M. Hadjiiski, J. Shi, Univ. of Michigan (USA)

A new reconstruction method to improve SNR for an inverse geometry CT system [6913-106]
J. Baek, N. J. Pelc, Stanford Univ. (USA)

Tomographic reconstruction of band-limited hermite expansions [6913-107]
W. Park, G. S. Chirikjian, Johns Hopkins Univ. (USA)

MLSD-OSEM reconstruction algorithm for cosmic ray muon radiography [6913-108]
Y. Liu, Z. Zhao, Z. Chen, L. Zhang, Y. Xing, Tsinghua Univ. (China)
POSTER SESSION: ALGORITHMS

6913 32 Lossy raw data compression in computed tomography with noise shaping to control image effects [6913-109]
Y. Xie, A. S. Wang, N. J. Pelc, Stanford Univ. (USA)

6913 33 Beam hardening correction based on HL consistency in polychromatic transmission tomography [6913-110]
X. Mou, S. Tang, T. Luo, Y. Zhang, Xi’an Jiaotong Univ. (China); H. Yu, Virginia Tech (USA)

6913 34 Effect of the frequency content and spatial location of raw data errors on CT images [6913-111]
A. S. Wang, Y. Xie, N. J. Pelc, Stanford Univ. (USA)

6913 35 A 3D metal artifact correction method in cone-beam CT bone imaging by using an implant image library [6913-112]
Y. Zhang, R. Ning, D. Conover, Univ. of Rochester (USA)

6913 36 Accurate measurement of respiratory airway wall thickness in CT images using a signal restoration technique [6913-113]
S. J. Park, Seoul National Univ. College of Medicine (South Korea); T. J. Kim, Seoul National Univ. Bundang Hospital (South Korea); K. G. Kim, National Cancer Ctr. (South Korea); S. H. Lee, J. M. Goo, J. H. Kim, Seoul National Univ. College of Medicine (South Korea)

6913 37 Reconstruction artifacts in VRX CT scanner images [6913-114]
D. A. Rendon, F. A. DiBianca, G. S. Keyes, Univ. of Tennessee Health Science Ctr. (USA)

6913 38 Quantification and elimination of windmill artifacts in multi slice CT [6913-115]
S. J. Utrup, K. M. Brown, Philips Healthcare (USA)

6913 3A Effects of scanning orbit wobbling and detector tilting on cone-beam tomography [6913-117]
Y. Ding, Z. Chen, P. Geng, Northeastern Univ. (China)

6913 3B Quantitative comparison of weighted Feldkamp FBP full-scan and half-scan algorithms for contrast-enhanced CT breast imaging [6913-118]
C. Didier, Univ. of Massachusetts, Lowell (USA) and Univ. of Massachusetts Medical School (USA); Y. Chen, Univ. of Massachusetts Medical School (USA); J. M. O’Connor, Univ. of Massachusetts, Lowell (USA) and Univ. of Massachusetts Medical School (USA); M. Mah’D, Univ. of Massachusetts, Lowell (USA); S. J. Glick, Univ. of Massachusetts Medical School (USA)

6913 3C Landmark based compensation of patient motion artifacts in computed tomography [6913-119]
Y. Pauchard, S. K. Boyd, Univ. of Calgary (Canada)

POSTER SESSION: MEASUREMENT, SIMULATION, AND MODELING

6913 3D Temporal-noise measurements of a CMOS camera used for image quality measurements [6913-121]
H. Roehrig, W. J. Dallas, Univ. of Arizona (USA); G. R. Redford, Optic Valley Photonics (USA)
New automatic quality control methods for geometrical treatment planning system tools in external conformal radiotherapy [6913-122]
E. Denis, IRCCyN/IVC (France); S. Beaumont, QualiFormeD SARL (France); J. Guédon, T. Torfeh, N. Normand, IRCCyN/IVC (France); N. Aillères, Ctr. Régional de Lutte Contre le Cancer (France)

Digital phantoms for the evaluation of a software used for an automatic analysis of the Winston-Lutz test in image guided radiation therapy [6913-123]
T. Torfeh, IRCCyN/IVC, École Polytechnique de l'Univ. de Nantes (France) and QualiFormeD SARL (France); S. Beaumont, D. Bonnet, QualiFormeD SARL (France); Y. Barbotteau, Ctr. Régional de Lutte Contre le Cancer (France); J. Guédon, N. Normand, IRCCyN/IVC, École Polytechnique de l'Univ. de Nantes (France) and QualiFormeD SARL (France); E. Denis, IRCCyN/IVC, École Polytechnique de l'Univ. de Nantes (France) and QualiFormeD SARL (France); Y. Barbotteau, Ctr. Régional de Lutte Contre le Cancer (France); N. Aillères, Ctr. Régional de Lutte Contre le Cancer (France)

A simulation framework for pre-clinical studies on dose and image quality: concept and first validation [6913-124]
K. Smans, Univ. Hospitals Leuven (Belgium) and SCK•CEN (Belgium); H. Pauwels, Univ. Hospitals Leuven (Belgium); F. Rogge, AIB-Vinçotte Controlatom (Belgium); L. Struelens, SCK•CEN (Belgium); O. Dragusin, Univ. Hospitals Leuven (Belgium); F. Vanhavere, SCK•CEN (Belgium); H. Bosmans, Univ. Hospitals Leuven (Belgium)

Validation of a GEANT4 simulation of neutron stimulated emission computed tomography [6913-125]
A. J. Kapadia, B. P. Harrawood, Duke Univ. Medical Ctr. (USA); G. D. Tourassi, Duke Univ. Medical Ctr. (USA) and Duke Univ. (USA)

Use of the detective quantum efficiency in a quality assurance program [6913-126]
I. A. Cunningham, Robarts Research Institute (Canada) and London Health Sciences Ctr. (Canada)

Radiation dose measurement for various parameters in MDCT [6913-127]
C.-L. Lee, H.-J. Kim, Yonsei Univ. (South Korea); S. S. Jeon, Wonju Christian Hospital (South Korea); H.-M. Cho, S. R. Nam, J.-Y. Jung, Yonsei Univ. (South Korea)

Dosimetric measurements and comparison studies in digital imaging system [6913-128]
J.-Y. Jung, H.-J. Kim, C.-L. Lee, H.-M. Cho, S. Nam, Yonsei Univ. (South Korea)

Estimation of x-ray parameters in digital coronary angiography for compensation of myocardial perfusion measurements [6913-129]
C. J. Storm, Hospital Walcheren (Netherlands); C. H. Slump, Univ. of Twente (Netherlands)

Computational method for automatic determination of radiographic equipment anode angle [6913-130]
M. A. C. Vieira, P. D. de Oliveira, Jr., H. Schiabel, Univ. de São Paulo (Brazil)

Performance assessment of a simple and accurate grid alignment aid for portable chest imaging [6913-131]
X. Wang, W. Huang, D. H. Foos, M. K. Rogers, Carestream Health, Inc. (USA)
Comparison of MTFs in x-ray CT images between measured by current method and considered linearity in low contrast [6913-133]
N. Fujita, Nagoya Univ. (Japan); K. Ichikawa, Kanazawa Univ. (Japan); T. Hara, Nakatsugawa Municipal General Hospital (Japan); Y. Kodera, Nagoya Univ. (Japan)

An analysis of Field II simulation [6913-134]
L. Candemir, The Scientific and Technological Research Council of Turkey (TÜBİTAK) (Turkey); I. Cilesiz, Istanbul Technical Univ. (ITU) (Turkey)

Experimental validation of a Monte Carlo-based kV x-ray projection model for the Varian linac-mounted cone-beam CT imaging system [6913-135]

POSTER SESSION: DETECTOR TECHNOLOGY

High resolution amplified pixel sensor architectures for large area digital mammography tomosynthesis (Honorable Mention Poster Award) [6913-136]
F. Taghibakhsh, K. S. Karim, Univ. of Waterloo (Canada)

Photodiode forward bias to reduce temporal effects in a-Si based flat panel detectors [6913-137]
I. Mollov, C. Tognina, R. Colbeth, Varian Medical Systems (USA)

Distortion, orientation, and translation corrections of tiled EMCCD detectors for the new solid state x-ray image intensifier (SSXII) [6913-138]
H. Hamwi, J. W. Lee, K. R. Hoffmann, S. Rudin, A. Verevkin, Univ. at Buffalo, SUNY (USA)

Modeling of dark current and ghosting in multilayer amorphous selenium x-ray detectors [6913-139]
M. Z. Kabir, F. Manouchehri, S. A. Mahmood, V. K. Devabhaktuni, Concordia Univ. (Canada); O. Tousignant, H. Mani, J. Greenspan, P. Botka, Anrad Corp. (Canada)

POSTER SESSION: SMALL ANIMAL AND NON X-RAY IMAGING

Soft tissue small avascular tumor imaging with x-ray phase-contrast micro-CT in-line holography [6913-144]
Y. Nesterets, T. Gureyev, A. Stevenson, A. Pogany, S. Wilkins, CSIRO Manufacturing and Materials Technology (Australia); R. Kincaid, H. Ye, L. Vogelsang, Syracuse Univ. (USA); E. Lipson, Syracuse Univ. (USA) and SUNY Upstate Medical Univ. (USA); I. Coman, SUNY Upstate Medical Univ. (USA); S. Fourmaux, J.-C. Kieffer, Univ. du Québec (Canada); A. Krol, SUNY Upstate Medical Univ. (USA) and Syracuse Univ. (USA)

A predictive software tool for optimal timing in contrast enhanced carotid MR angiography [6913-145]
A. N. Moghaddam, David Geffen School of Medicine at UCLA (USA) and California Institute of Technology (USA); T. Balawi, R. Habibi, David Geffen School of Medicine at UCLA (USA); C. Panknin, G. Laub, Siemens Medical Solutions (USA); S. Ruehm, J. P. Finn, David Geffen School of Medicine at UCLA (USA)
A feasibility study of the 3D fluorescent image reconstruction for the simultaneous PET and fluorescent CT imaging system using depth of interaction PET detector [6913-146]
H. Tashima, T. Obi, Tokyo Institute of Technology (Japan); T. Yamaya, H. Murayama, National Institute of Radiological Sciences (Japan); K. Kitamura, I. Oda, Shimadzu Corp. (Japan); M. Yamaguchi, N. Ohyama, Tokyo Institute of Technology (Japan)

A dual micro-CT system for small animal imaging [6913-147]

CT number variations in micro CT imaging systems [6913-148]
S.-J. Tu, H.-L. Hsieh, T.-C. Chao, Chang Gung Univ. (Taiwan)

Contrast imaging with a monochromatic x-ray scanner [6913-149]
D. J. Pole, K. Popovic, M. B. Williams, Univ. of Virginia (USA)

Ordered k-space acquisition in contrast enhanced magnetic resonance angiography (CE-MRA) [6913-152]
B. Wu, J. R. Maclaren, R. P. Millane, R. Watts, P. J. Bones, Univ. of Canterbury (New Zealand)

Development of an MR compatible rotating anode x-ray tube [6913-153]
P. Lillaney, Stanford Univ. School of Medicine (USA); J. Bracken, Univ. of Toronto (Canada) and Sunnybrook Health Sciences Ctr. (Canada); A. Ganguly, Stanford Univ. School of Medicine (USA); P. Rowlands, Univ. of Toronto (Canada) and Sunnybrook Health Sciences Ctr. (Canada); R. Fahrig, Stanford Univ. School of Medicine (USA)

Parameter optimization for a grating-based phase contrast x-ray system [6913-154]
B. Koo, Virginia Polytechnic Institute and State Univ. (USA); M. Jiang, Peking Univ. (China) and Virginia Polytechnic Institute and State Univ. (USA); C. L. Wyatt, G. Wang, Virginia Polytechnic Institute and State Univ. (USA)

A numerical analysis of the Born approximation for image formation modeling of differential interference contrast microscopy for human embryos [6913-155]
S. Trattner, M. Feigin, H. Greenspan, N. Sochen, Tel Aviv Univ. (Israel)

The effects of respiration motion in PET/CT studies [6913-156]
L. Wan, Huazhong Univ. of Science and Technology (China) and Hubei Province Key Lab. of Molecular Imaging (China); Z. Wu, Hubei Province Key Lab. of Molecular Imaging (China) and Huazhong Univ. of Science and Technology (China); F. Zhou, Huazhong Univ. of Science and Technology (China) and Hubei Province Key Lab. of Molecular Imaging (China); S. Ye, S. Zeng, Huazhong Univ. of Science and Technology (China); C.-M. Kao, C.-T. Chen, The Univ. of Chicago (USA); Y. Zhang, Hubei Province Key Lab. of Molecular Imaging (China) and Huazhong Univ. of Science and Technology (China); Q. Xie, Huazhong Univ. of Science and Technology (China) and Hubei Province Key Lab. of Molecular Imaging (China) and The Univ. of Chicago (USA)

An investigation of digital signal processing for shaped pulses for all-digital PET [6913-157]
Q. Xie, Huazhong Univ. of Science and Technology (China) and The Univ. of Chicago (USA); J. Zhu, X. Wang, B. Zhang, C. Zhu, N. Guo, Z. Zhang, Huazhong Univ. of Science and Technology (China); C.-T. Chen, Y. W. Wah, M. Bogdan, C.-M. Kao, The Univ. of Chicago (USA)
Evaluation of the partial flip angle spin echo method to improve non-uniformity in T1-weighted imaging with the 3-tesla MRI

Y. Watanabe, M. Tsuzaka, Nagoya Univ. (Japan); K. Ishibashi, Y. Sakurai, Nagoya Univ. Hospital (Japan)

Motion gated small animal imaging with a flat-panel CT

M. Grasruck, Siemens Healthcare (Germany); S. Bartling, J. Dinkel, F. Kiessling, W. Semmler, German Cancer Research Ctr. (Germany); K. Stierstorfer, B. Schmidt, Siemens Healthcare (Germany)

Frequency diversity in breast ultrasound tomography (Honorable Mention Poster Award)

F. Simonetti, Imperial College London (United Kingdom) and Los Alamos National Lab. (USA); L. Huang, Los Alamos National Lab. (USA); N. Duric, Wayne State Univ. (USA)

Screen optics effects on DQE in digital radiography: spatial frequency effects

A. R. Lubinsky, W. Zhao, SUNY (USA); K. Suzuki, Hamamatsu Photonics K.K. (Japan)

Non-circular scans and image reconstruction for breast CT

J. Bian, The Univ. of Chicago (USA); N. J. Packard, K. Yang, Univ. of California, Davis Medical Ctr. (USA); D. Xia, The Univ. of Chicago (USA); J. M. Boone, Univ. of California, Davis Medical Ctr. (USA); X. Pan, The Univ. of Chicago (USA)

Design of a multiple component geometric breast phantom

K. G. Baum, Rochester Institute of Technology (USA); K. McNamara, Honeoye Falls-Lima High School (USA); M. Helguera, Rochester Institute of Technology (USA)

Impact of heel effect and ROI size on the determination of contrast-to-noise ratio for digital mammography systems

A. Alsager, K. C. Young, Royal Surrey County Hospital (United Kingdom) and Univ. of Surrey (United Kingdom); J. M. Oduko, Royal Surrey County Hospital (United Kingdom)

Impact of dose on observer performance in breast tomosynthesis using breast specimens

P. Timberg, Lund Univ., Malmö Univ. Hospital (Sweden); M. Båth, Sahlgrenska Univ. Hospital (Sweden); I. Andersson, T. Svahn, M. Ruschin, B. Hemdal, S. Mattsson, A. Tingberg, Lund Univ., Malmö Univ. Hospital (Sweden)

Optimizing the anode-filter combination in the sense of image quality and average glandular dose in digital mammography

M. Varjonen, P. Strömmer, Planmed Oy (Finland)

Microcalcification detectability in tomosynthesis (Cum Laude Poster Award)

B. A. Lau, I. S. Reiser, R. M. Nishikawa, The Univ. of Chicago (USA)

Improvement in image quality of computed radiography systems for mammography

C.-Y. J. Yang, W. Huang, Carestream Health, Inc. (USA)
Toward quantification of breast tomosynthesis imaging [6913-170]
C. M. Shafer, Duke Univ. Medical Ctr. (USA) and Duke Univ. (USA); E. Samei, R. S. Saunders, Duke Univ. Medical Ctr. (USA); M. Zerhouni, Computerized Imaging Reference Systems, Inc. (USA); J. Y. Lo, Duke Univ. Medical Ctr. (USA) and Duke Univ. (USA)

Digital tomosynthesis mammography: improvement of artifact reduction method for high-attenuation objects on reconstructed slices [6913-171]
J. Ge, H.-P. Chan, B. Sahiner, Y. Zhang, J. Wei, L. M. Hadjiiski, C. Zhou, Y.-T. Wu, J. Shi, Univ. of Michigan (USA)

POSTER SESSION: X-RAY RADIOGRAPHY AND CT

On the angular dependence of Bremsstrahlung x-ray emission (Honorable Mention Poster Award) [6913-172]
A. Ganguly, N. J. Pelc, Stanford Univ. (USA)

Separation of bone from iodine- and gadolinium-based contrast agents using dual energy CT (Honorable Mention Poster Award) [6913-173]
D. Y. Chong, E. Angel, H. J. Kim, G. B. Cole, L. Bayadzhyan, Univ. of California, Los Angeles (USA); C. Panknin, Siemens AG, Medical Solutions (USA); A. M. Gomez, J. G. Goldin, M. S. Brown, F. McNitt-Gray, Univ. of California, Los Angeles (USA)

Evaluation of the contrast-detail response of a cardiovascular angiography system and the influence of equipment variables on image quality [6913-174]
O. Dragusin, K. Smans, J. Jacobs, Univ. Hospitals Leuven (Belgium); T. Inal, Ankara Univ. (Turkey); H. Bosmans, Univ. Hospitals Leuven (Belgium)

Evaluation of exposure dose reduction in multislice CT coronary angiography (MS-CTA) with prospective ECG-gated helical scan [6913-175]
T. Ota, Toshiba Information Systems Corp. (Japan); M. Tsuyuki, M. Okumura, Toshiba Medical Systems Corp. (Japan); T. Sano, T. Kondo, S. Takase, Takase Clinic (Japan)

Comparison of the performances between anti-scatter grid and slot scanning technique for digital chest radiography: effect of anatomical background [6913-176]
C.-J. Lai, C. C. Shaw, X. Liu, L. Chen, T. Han, T. Wang, The Univ. of Texas M.D. Anderson Cancer Ctr. (USA)

C-arm based cone-beam CT using a two-concentric-arc source trajectory: system evaluation [6913-177]
J. Zambelli, T. Zhuang, B. E. Nett, Univ. of Wisconsin, Madison (USA); C. Riddell, GE Healthcare (France); B. Belanger, GE Healthcare (USA); G.-H. Chen, Univ. of Wisconsin, Madison (USA)

Dose saving and scatter reduction in volume-of-interest (VOI) cone beam CT: work in progress [6913-178]
C.-J. Lai, C. C. Shaw, L. Chen, X. Liu, T. Han, T. Wang, The Univ. of Texas M.D. Anderson Cancer Ctr. (USA)
Braga: an easy to use and accurate grid alignment system to control scatter and improve image quality in bedside radiography [6913-179]
D. M. Gauntt, X-Ray Imaging Innovations (USA); G. T. Barnes, X-Ray Imaging Innovations (USA) and Univ. of Alabama at Birmingham Health Systems (USA)

Effect of spatial direction and acquisition techniques on noise power spectra in x-ray CT [6913-180]
K. Boedeker, Toshiba America Medical Systems, Inc. (USA); A. A. Zamyatin, Toshiba Medical Research Institute USA (USA); X. Wang, Northern Illinois Univ. (USA)

Analysis of axial spatial resolution in a variable resolution x-ray cone beam CT (VRX-CBCT) system [6913-181]
B. Dahi, G. S. Keyes, D. A. Rendon, F. A. DiBianca, The Univ. of Tennessee Health Science Ctr. (USA)

Quantitative imaging of chemical composition using dual-energy, dual-source CT [6913-182]
X. Liu, A. N. Primak, L. Yu, C. H. McCollough, R. L. Morin, Mayo Clinic (USA)

Effects of digital geometry and phantom size on cone-beam CT point spread function measurement [6913-183]
Z. Chen, Northeastern Univ. (China); Y. Tao, Univ. of Maryland, College Park (USA)

A comparison of three CT voltage optimization strategies [6913-184]
K. M. Ogden, W. Huda, M. R. Khorasani, E. M. Scalzetti, SUNY Upstate Medical Univ. (USA)

The built-in capacity of CT D’Or’s static ring for scatter correction [6913-185]
H. Schlattl, C. Hoeschen, Helmholtz Zentrum München, German Research Ctr. for Environmental Health (Germany)

Analysis of in-plane signal-to-noise ratio in computed tomography [6913-186]
T. Hara, Nakatsugawa Municipal General Hospital (Japan) and Kanazawa Univ. (Japan); K. Ichikawa, S. Sanada, Kanazawa Univ. (Japan); Y. Ida, Fujita Health Univ. Hospital (Japan)

Influence of motion on image quality with a 64-channel CT scanner [6913-189]
R. Grosjean, A. Benhadid, IADI, CHU Nancy (France); A. Blum, CHU Nancy (France); J. Hubert, IADI, CHU Nancy (France) and CHU Nancy (France); J. Felblinger, IADI, CHU Nancy (France)

Geometry calibration for x-ray equipment in radiation treatment devices and estimation of remaining patient alignment errors [6913-190]
B. P. Selby, Medcom GmbH (Germany); G. Sakas, Fraunhofer IGD (Germany); S. Walter, Medcom GmbH (Germany); U. Stilla, Technische Univ. Muenchen (Germany)

Development of a quality control program for a cone beam CT imaging system [6913-191]
R. Betancourt Benitez, Univ. of Rochester Medical Ctr. (USA) and Univ. of Rochester (USA); R. Ning, D. Conover, Y. Zhang, Univ. of Rochester Medical Ctr. (USA); W. Cai, Univ. of Rochester Medical Ctr. (USA) and Univ. of Rochester (USA)
Reduced inter-exposure time in dual-energy imaging: a technological and image processing cooperative approach [6913-192]
C. S. Coello, J.-M. Dinten, M. Arques, CEA-LETI-MINATEC (France); P. Rohr, Trixell (France); C. Odet, CREATIS (France)

Bone mineral imaging using a digital magnification mammography system [6913-193]
F. Toyofuku, K. Tokumori, Y. Higashida, H. Arimura, J. Morishita, M. Ohki, Kyushu Univ. (Japan)

Two-dimensional anti-scatter grids for computed tomography detectors [6913-195]
G. Vogtmeier, R. Dorscheid, K. J. Engel, Philips Research Europe – Aachen (Germany); R. Luhta, R. Mattson, B. Harwood, Philips Medical Systems (USA); M. Appleby, B. Randolph, J. Klinger, Mikro Systems, Inc. (USA)

LabVIEW graphical user interface for a new high sensitivity, high resolution micro-angi-fluoroscopic and ROI-CBCT system [6913-196]
C. Keleshis, C. N. Ionita, G. Yadava, V. Patel, D. R. Bednarek, K. R. Hoffmann, A. Verevkin, S. Rudin, Univ. at Buffalo, SUNY (USA)

Impact on image quality when a variety of x-ray source detector distances are considered for the arthritic cervical spine [6913-197]
M. Joyce, P. C. Brennan, L. A. Rainford, J. Last, J. T. Ryan, Univ. College Dublin (Ireland)

CT imaging with a mobile C-arm prototype [6913-198]
A. Cheryauka, D. Tubbs, V. Langille, P. Kalya, B. Smith, R. Cherone, GE Healthcare Surgery (USA)

15 Algorithms and Reconstructions  
*Katsuyuki Taguchi*, Johns Hopkins University (USA)

Workshop: Multi-Energy X-ray and CT Imaging: Where we are and where will we go?  
*Katsuyuki Taguchi*, Johns Hopkins University (USA)  
*Thomas G. Flohr*, Siemens Medical Solutions (Germany)
In Memoriam

Sam Dwyer
1932–2008

Inspirational planner for SPIE Medical Imaging symposia and chair of 15 conferences from 1983 to 1996

Sam Dwyer was a leading light in the swift growth of the field of medical imaging. At this 2008 Medical Imaging symposium, several colleagues expressed their appreciation of his professional achievements and the legacy of his contributions.

Andre Duerinckx recalls Sam's first big step into the limelight. "Sam chaired the Second International PACS meeting sponsored by SPIE in 1983. He stepped in when my professional direction shifted and I could not continue. Over the following years Sam became a leading force in the development of this new science and technology as the conferences developed and grew."

"He had an ability to predict important technology trends in medical imaging," says Steven Horii, a long-time SPIE Medical Imaging contributor and past conference chair.

Another past Medical Imaging conference chair with years of experience, Roger Schneider elaborates, "The growth of the initial conferences was phenomenal. They quickly expanded and outgrew several facilities. Topic areas increased. For example, we had been dealing with perception in sessions on image statistics. Sam first suggested that the field of perception theory and experiment was expanding so rapidly that it deserved its own conference. We also added conferences on image processing hardware, display, functional imaging, and special topics in ultrasound transducers."

"Sam was a true pioneer in our field," continues Schneider. "He was one of the first to envision the impact of digital technology on the storage, retrieval, communication, and
display of medical images, and one of the most active early explorers of the possibilities. He led the PACS conference into the merger with SPIE’s image science conference to form the current Medical Imaging Symposium which many consider to be the premiere technical program on medical imaging in the world.”

Murray Loew, another past conference chair, adds his observation, "Sam’s academic, industrial, and clinical experience provided the perspective that enabled him to set priorities and give advice that helped many of us to make our own contributions. We all benefited greatly from his insights and his practical approach.”

Schneider agrees. "Through all, Sam was an excellent partner and leader, calm, gentle yet persuasive, always congenially nudging everyone toward a better future. His ambitions were not for himself, but for the mutual enterprise. He was a very enthusiastic mentor and supporter of students and researchers new to the field without any concern for the possibility that their work might compete with his and was himself a superbly competent contributor.”

An example of this is illustrated by John Strauss." Already well accomplished at the time of our first meeting, Sam made the time to take an eager but inexperienced student under his wing. I was not an 'assigned' grad student or research assistant from the University to which he had an obligation. I was a product manager from a vendor-partner. Over the years, from answering technical questions in an understandable way, to providing unassuming career guidance, as well as a sympathetic ear to the challenges of fatherhood or life’s many challenges and struggles, Sam was always there for me.”

"There are many things about Sam Dwyer that I recall with great fondness, like his always friendly and enthusiastic manner. His advice led me to my years of satisfying work on the ACR-NEMA Committee,” adds Horii.

All agree that Sam had many other admirable traits. His wit and sense of humor were legendary, as one of Schneider’s favorite memories illustrates. "At the opening of one conference Sam announced, from the podium, that it was the birthday of an important attendee. He said SPIE had requested that the Blue Angels do a flyover—but they already had something scheduled. As a substitute birthday recognition, Sam suggested we take our morning coffee break out on the terrace and watch the landscaping crew circle the flagpole on their riding lawnmowers.”

Strauss describes the footprint left by Sam, "While Sam left a legacy through his professional accomplishments, perhaps more lasting is the heritage of leadership he has left behind. He felt it his obligation to pass on his knowledge and wisdom to the next generation, and I was blessed as a recipient. I have and will continue to honor Sam by sharing with those that come after me.”

Sam Dwyer was a person of rare quality who will be sorely missed. His name has a permanent place in the annals of medical imaging, and his contributions continue in the flourishing growth of knowledge presented and discussed in the annual Medical Imaging conferences.
