Addressing security, collaboration, and usability with tactical edge mobile devices and strategic cloud-based systems [8405-13]
C. J. Graham, Raytheon Co. (United States)

A decision and utility theory construct for dynamic spectrum access systems [8405-14]
T. W. Martin, K.-C. Chang, George Mason Univ. (United States)

Information dissemination in disadvantaged wireless communications using a data dissemination service and content data network [8405-15]
M. Gillen, J. Loyall, K. Zita Haigh, R. Walsh, C. Partridge, G. Lauer, T. Strayer, Raytheon BBN Technologies (United States)

Advanced thermal management technologies for defense electronics (Invited Paper) [8405-17]
K. P. Bloschock, System Planning Corp. (United States); A. Bar-Cohen, Defense Advanced Research Projects Agency (United States)

Wide area persistent surveillance with no gimbal [8405-18]
G. Egnal, Argusight, Inc. (United States)

Kestrel: force protection and Intelligence, Surveillance, and Reconnaissance (ISR) persistent surveillance on aerostats [8405-20]
D. R. Luber, J. E. Marion, D. Fields, Logos Technologies, Inc. (United States)
Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chair

Raja Suresh, General Dynamics Advanced Information Systems (United States)

Program Committee

Vasu D. Chakravarthy, Air Force Research Laboratory (United States)
John S. Eicke, U.S. Army Research Laboratory (United States)
Bassam S. Farroha, U.S. Department of Defense (United States)
Deborah L. Farroha, U.S. Department of Defense (United States)
Paul Gaertner, Embassy of Australia (United States)
Gayle D. Grant, U.S. Army Communications-Electronics Command (United States)
Michael A. Kolodny, U.S. Army Research Laboratory (United States)
Leo J. Rose, U.S. Air Force (United States)
Larry B. Stotts, Defense Advanced Research Projects Agency (United States)
Venkataraman Sundareswaran, Teledyne Scientific Company (United States)
Guy Vézina, Defence Research and Development Canada, Valcartier (Canada)

Session Chairs

1  Net-Centric Architectures and Systems
   Raja Suresh, General Dynamics Advanced Information Systems (United States)
   Deborah L. Farroha, U.S. Department of Defense (United States)

2  Communications and Networks
   Raja Suresh, General Dynamics Advanced Information Systems (United States)
   Deborah L. Farroha, U.S. Department of Defense (United States)
3 Multi-Robot Control: Joint Session with Conference 8387
Raja Suresh, General Dynamics Advanced Information Systems (United States)
Grant R. Gerhart, U.S. Army Tank Automotive Research, Development and Engineering Center (Retired) (United States)

4 Wide Area Persistent ISR and Networked Sensors I: Joint Session with Conference 8389
Raja Suresh, General Dynamics Advanced Information Systems (United States)
Tien Pham, U.S. Army Research Laboratory (United States)

5 Wide Area Persistent ISR and Networked Sensors II: Joint Session with Conference 8389
Raja Suresh, General Dynamics Advanced Information Systems (United States)
Tien Pham, U.S. Army Research Laboratory (United States)
Introduction

These are the proceedings of the seventeenth Defense Transformation and Net-centric Systems conference. The papers presented at the conference strongly reflected the inexorable trend towards net-centric systems and multi-INT layered sensing architectures. The conference included the following joint sessions:

1. Self-organizing Collaborative Unmanned ISR Robotic Teams, held jointly with the Unmanned Systems Technology conference. Collaborative autonomous systems portend the increasing use of autonomous sensor and shooter platforms to perform the D3 (Dirty, Dull and Dangerous) missions in an era of declining force structures.

2. Sensor Networks and Wide Area Persistent Surveillance, held jointly with the Ground/Air Multi-sensor Interoperability, Integration, and Networking for Persistent ISR conference.

The conference also included invited papers by Dr. Megan Cramer, et al (US Navy) on levels of openness in Open Architecture Systems, and by Dr. Avram Bar-Cohen, et al (DARPA) on thermal management technologies for low SWaP electronic packages.

Looking ahead, we expect Net-centric systems to increasingly focus on Open Architectures (OA) and Open Business Models (OBM). Such OA/OBM systems seek to mimic the successful PC industry and hold the promise to dramatically reduce the acquisition and life cycle costs of military systems, and tremendously accelerate the rate of technology refresh in military systems.

It is gratifying to see the high level of audience interest in this conference. Particularly gratifying is the fact that this conference has resulted in the “spin-off” of several new conferences at SPIE. My sincere thanks to the distinguished invited speakers, authors, attendees, and my associates on the program committee for another successful conference.

Raja Suresh
