Volume 12019

Proceedings of SPIE 0277-786X, V. 12019

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AI and Optical Data Sciences III, edited by Bahram Jalali,
Ken-ichi Kitayama, Proc. of SPIE Vol. 12019, 1201901
© 2022 SPIE · 0277-786X · doi: 10.1117/12.2634740

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *AI and Optical Data Sciences III*, edited by Bahram Jalali, Ken-ichi Kitayama, Proc. of SPIE 12019, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

AI IN IMAGING II

12019 02 **Damage segmentation using small convolutional neuronal networks and adversarial training methods on low-quality RGB video data** [12019-12]

12019 03 **Snapshot-to-video autoencoder for compressed ultra-high-speed imaging** [12019-14]

12019 04 **Real time eye gaze tracking for human machine interaction in the cockpit** [12019-15]

AR/VR

12019 05 **Beaming displays: towards displayless augmented reality near-eye displays (Invited Paper)** [12019-3]

12019 06 **Metasurface for imaging and AR/VR devices (Invited Paper)** [12019-4]

QUANTUM COMPUTING AND ENCRYPTION

12019 07 **648-Hilbert space dimensionality in biphoton frequency combs for quantum-secure communications and networks (Invited Paper)** [12019-18]

12019 08 **Assessing machine learning solutions for high-speed data analysis and imaging for a single photon timing detector with 60 ps single photon timing per channel** [12019-19]

BRAIN-INSPIRED PHOTONIC AI

12019 09 **Phase change materials: the 'silicon' for analog photonic computing? (Invited Paper)** [12019-24]

12019 0A **Non-normality in neural networks (Invited Paper)** [12019-25]

PHOTONIC HARDWARE ACCELERATORS AND OPTICAL COMPUTING I

12019 0B **4F optical neural network acceleration: an architecture perspective (Invited Paper)** [12019-27]

12019 0C **Photonic accelerator based on optical chaos (Invited Paper)** [12019-28]

12019 0D **Design of asymptotically perfect linear photonic circuits** [12019-32]

OPTICAL SENSING AND COMMUNICATION I

12019 0E **Cooperative self-localization and wayfinding services through visible light communication** [12019-42]

12019 0F **Particle detection using closed-loop active model diagnosis** [12019-43]

OPTICAL SENSING AND COMMUNICATION II

12019 0H **Machine learning for deep space network antenna motions detection** [12019-48]

12019 0J **Use of machine learning in a speckle-based optical fiber sensor for temperature detection** [12019-49]

PHYSICS-AI CONVERGENCE I

12019 0G **Filter-based photonic reservoir computing as a key-enabling platform for all-optical, high-speed processing of time-stretched images and telecomm data (Invited Paper)** [12019-50]

12019 0K **Silicon photonic neural network applications and prospects (Invited Paper)** [12019-52]

12019 0L **Neural networks to solve forward and inverse problems in diffuse reflectance spectroscopy** [12019-54]

12019 0M **The artificial intelligent Pixel (aiPixel)** [12019-55]

PHYSICS-AI CONVERGENCE II

12019 0N **Broadband radio-frequency signal processing with neuromorphic photonics (Invited Paper)** [12019-60]

12019 0O **A physics-inspired approach to overcome oscillatory loss landscapes in the inverse design of optical components** [12019-64]

POSTER SESSION

12019 0P **Quality inspection of translucent and micro-structured functional surfaces** [12019-66]

12019 0Q **Efficient training for the hybrid optical diffractive deep neural network** [12019-68]

12019 0S **Depth image super resolution method for time-of-flight camera based on machine learning** [12019-70]

Conference Committee

Symposium Chairs

Bernd Witzigmann, Friedrich-Alexander-Universität Erlangen-Nürnberg (Germany)
Sonia M. García-Blanco, University of Twente (Netherlands)

Symposium Co-Chairs

Sailing He, Zhejiang University (China) and KTH Royal Institute of Technology (Sweden)
Yasuhiro Koike, Keio University (Japan)

Program Track Chair

David L. Andrews, University of East Anglia (United Kingdom)

Conference Chairs

Bahram Jalali, UCLA Samueli School of Engineering (United States)
Ken-ichi Kitayama, National Institute of Information and Communications Technology (Japan) and Hamamatsu Photonics (Japan)

Conference Program Committee

Barmak Heshmat, BRELYON, Inc. (United States)
Ryoichi Horisaki, The University of Tokyo (Japan)
Yunshan Jiang, Waymo, LLC (United States)
Achuta Kadambi, UCLA Samueli School of Engineering (United States)
Koichiro Kishima, Pinpoint Photonics, Inc. (Japan)
Cejo K. Lonappan, UCLA Samueli School of Engineering (United States)
Ruben S. Luís, National Institute of Information and Communications Technology (Japan)
Arka Majumdar, University of Washington (United States)
Masaya Notomi, NTT Basic Research Labs. (Japan)
Aydogan Ozcan, UCLA Samueli School of Engineering (United States)
Demetri Psaltis, École polytechnique fédérale de Lausanne (Switzerland)
Varun Raghunathan, Indian Institute of Science, Bengaluru (India)
Natan T. Shaked, Tel Aviv University (Israel)

Volker J. Sorger, The George Washington University (United States)
Madhuri Suthar, UCLA Samueli School of Engineering (United States)
Haruyoshi Toyoda, Hamamatsu Photonics K.K. (Japan)
George C. Valley, The Aerospace Corporation (United States)
Ming C. Wu, University of California, Berkeley (United States)
