

PROCEEDINGS OF SPIE

Laser Communication and Propagation through the Atmosphere and Oceans XI

**Jaime A. Anguita
Jeremy P. Bos
David T. Wayne**
Editors

**22–23 August 2022
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 12237

Proceedings of SPIE 0277-786X, V. 12237

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Laser Communication and Propagation through the Atmosphere and Oceans XI, edited by
Jaime A. Anguita, Jeremy P. Bos, David T. Wayne, Proc. of SPIE Vol. 12237, 1223700
© 2022 SPIE · 0277-786X · doi: 10.1117/12.2662068

Proc. of SPIE Vol. 12237 1223700-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Communication and Propagation through the Atmosphere and Oceans XI*, edited by Jaime A. Anguita, Jeremy P. Bos, David T. Wayne, Proc. of SPIE 12237, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

OPTICAL COMMUNICATIONS IN THE ATMOSPHERE

- 12237 01 **Measuring the effect of real atmospheric turbulence on coherent free-space optical communications links (Invited Paper)** [12237-1]
- 12237 02 **Common analog and digital design for flexible radio and optical wireless systems** [12237-2]
- 12237 03 **Adaptive optics for daytime deep-space optical communications** [12237-3]
- 12237 05 **Experimental study on the effects of turbulence induced scintillations on a practical free-space communication link at high bandwidth** [12237-5]

ADVANCED TOPICS ON LASER PROPAGATION

- 12237 06 **Generation of RF radiation by laser pulse trains in air** [12237-6]
- 12237 07 **Free-space, pulsed optical time transfer through turbid water** [12237-7]
- 12237 08 **Optimal transport theory for processing and classifying OAM superpositions distorted by turbulence** [12237-8]

TURBULENCE EFFECTS ON LASER PROPAGATION: MODELING AND SIMULATION

- 12237 09 **Simulations of uplink precompensation for laser communications** [12237-10]
- 12237 0A **Long-term beam size analysis in the focal plane for atmospheric turbulence-affected laser beams** [12237-11]

ATMOSPHERIC PROPAGATION AND CHARACTERIZATION I: JOINT SESSION WITH CONFERENCES 12237 AND 12239

- 12237 0B **Characterization of C-band laser transmitter through atmosphere in littoral environment** [12237-14]
- 12237 0C **Low-altitude laser propagation link over a marine surface** [12237-15]

- 12237 OD **Digital adaptive optics for turbulence mitigation with QR codes** [12237-16]
- 12237 OE **Reduction of scintillation using broad spectrum optical source for use in FSO** [12237-17]
- 12237 OF **Experimental campaign for the propagation and measurement of OAM beams over a 1-km terrestrial range** [12237-18]

**ATMOSPHERIC PROPAGATION AND CHARACTERIZATION III: JOINT SESSION WITH CONFERENCES
12237 AND 12239**

- 12237 OG **Comparison of power spectrum and structure function methods to calculate turbulence parameters from sonic anemometer data (Invited Paper)** [12237-19]
- 12237 OH **TISTEF Camera and Anemometer Turbulence System (T-CATS) for estimating C_n^2 with ground temperature** [12237-22]
- 12237 OI **Impact of rainfall on the propagation of 1.5 μ m** [12237-23]

POSTER SESSION

- 12237 OK **Generation of orbital angular momentum in a C-band laser** [12237-24]
- 12237 OL **Fast phase locking method for homodyne laser communication based on direct phase control** [12237-25]
- 12237 OM **Analysis of atmospheric conditions for optimizing optical communications** [12237-27]

Conference Committee

Program Track Chairs

Stephen Hammel, Naval Information Warfare Center Pacific
(United States)

Alexander M. J. van Eijk, TNO Defence, Security, and Safety
(Netherlands)

Conference Chairs

Jaime A. Anguita, Universidad de los Andes (Chile)

Jeremy P. Bos, Michigan Technological University (United States)

David T. Wayne, Naval Information Warfare Center Pacific
(United States)

Conference Program Committee

Larry C. Andrews, University of Central Florida (United States)

Shlomi Arnon, Ben-Gurion University of the Negev (Israel)

Sukanta Basu, Technische Universiteit Delft (Netherlands)

Matthew M. Bold, Lockheed Martin Space Systems Company
(United States)

Mikhail I. Charnotskii, MC Consulting (United States)

Gang Chen, University of California, Riverside (United States)

Christopher C. Davis, University of Maryland, College Park
(United States)

Szymon Gladysz, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung IOSB (Germany)

Stephen Hammel, Naval Information Warfare Center Pacific
(United States)

Vladimir B. Markov, Advanced Systems and Technologies, Inc.
(United States)

Ronald L. Phillips, University of Central Florida (United States)

William S. Rabinovich, U.S. Naval Research Laboratory (United States)

Karin Stein, Fraunhofer-Institut für Optronik, Systemtechnik und
Bildauswertung IOSB (Germany)

Alexander M. J. van Eijk, TNO Defence, Security and Safety
(Netherlands)

Miranda van Iersel, University of Dayton (United States)

Thomas Weyrauch, University of Dayton (United States)

Otakar Wilfert, Brno University of Technology (Czech Republic)
