Volume 12507

Proceedings of SPIE 0277-786X, V. 12507

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Advanced Optical Manufacturing Technologies and Applications 2022; and 2nd Intl. Forum of Young Scientists on
Advanced Optical Manufacturing (AOMTA and YSAOM 2022), edited by Xuejun Zhang, et al.,
Proc. of SPIE Vol. 12507, 1250701 · © 2023 SPIE · 0277-786X · doi: 10.1117/12.2669890

Proc. of SPIE Vol. 12507 1250701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Optical Manufacturing Technologies and Applications 2022; and 2nd International Forum of Young Scientists on Advanced Optical Manufacturing (AOMTA and YSAOM 2022)*, edited by Xuejun Zhang, Hongbo Sun, Yuegang Fu, Lingbao Kong, Dawei Zhang, Donglin Xue, Changxi Xue, Proc. of SPIE 12507, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix	<i>Conference Committee</i>
xi	<i>Conference Organization and Sponsors</i>

AOMTA AND YSAOM 2022

12507 02	The simulation study of thermal design method for space optical window [12507-1]
12507 03	A structure based on fiber optic gyroscopes for gravity measurement [12507-2]
12507 04	Damage propagation prediction of composite joint under tensile loading and experimental verification using FBG sensors [12507-3]
12507 05	Research on the key technology of power over fiber transmission based on OPGW power cable [12507-5]
12507 06	FBG sensing detection of composite hidden multi-delamination [12507-6]
12507 07	Multi-channel optical cables identification technology based on ϕ-OTDR [12507-7]
12507 08	Phase noise suppression method of DFB fiber laser microphone based on optical reference [12507-8]
12507 09	Stereo matching with local cost volume refinement network [12507-9]
12507 0A	Study on radial uniformity of large aperture capacitively coupled plasma [12507-10]
12507 0B	Thermal pipeline safety monitoring based on fiber Bragg grating sensor [12507-12]
12507 0C	Periodic silicon surface structures fabricated by infrared nanosecond pulse laser ablation in ambient air for enhanced anti-reflection [12507-13]
12507 0D	Surface bilateral profile measurement of curved transparent components based on chromatic confocal sensor [12507-14]
12507 0E	Study of liquid-solid phase interface method of explosives based on distributed fiber optic sensors [12507-15]
12507 0F	Research on the influences of carrier deviation on digital moiré interferometric technique [12507-16]
12507 0G	Compensation of dispersion-induced power fading in radio-over-fiber system based on stimulated Brillouin scattering [12507-17]

- 12507 OH **Research on large-scale measurement field deployment technology based on FBI algorithm** [12507-18]
- 12507 OI **Study on mechanism of action between mirror surface shape and active force** [12507-19]
- 12507 OJ **Sensitivity measurement in x-ray phase-contrast imaging using cascaded grating interferometers** [12507-21]
- 12507 OK **Equivalent circuit model of semiconductor laser for high frequency FMCW LiDAR** [12507-22]
- 12507 OL **Underwater scattering imaging based on obtaining polarization characteristics of full field of view** [12507-24]
- 12507 OM **Simulation and experimental study of replication of x-ray focusing mirrors** [12507-25]
- 12507 ON **Research on DSoF transmission technology based on delta-sigma modulation** [12507-26]
- 12507 OO **Measurement of granular temperature based on transmission speckle visibility spectroscopy** [12507-29]
- 12507 OP **Research on the optical properties of $\text{SiO}_2\text{-Al}_2\text{O}_3$ sintering material** [12507-30]
- 12507 OQ **Generation mechanism and elimination method of gas trapping defect during precision glass molding for aspherical glass microlenses** [12507-31]
- 12507 OR **Experimental study on surface defect measurement of ultra-precision curved optical components** [12507-33]
- 12507 OS **A microwave photonic radar system with coherent dual band and large bandwidth** [12507-34]
- 12507 OT **Terahertz circularly polarized detection structures based on metasurfaces with high transmittance and extinction ratio** [12507-36]
- 12507 OU **Design and analysis of rapid scanning scheme by rotating for coaxial two-mirror system** [12507-37]
- 12507 OV **Research on key technology of compound polishing of off-axis parabolic mirror** [12507-38]
- 12507 OW **Optical waveguide manufactured in photo-thermo-refractive glass substrate by ion exchange** [12507-39]
- 12507 OX **Influence mechanism of surface shape accuracy and surface quality in ultra-precision grinding** [12507-40]
- 12507 OY **Design of ultrafast laser plasma x-ray source in laboratory** [12507-41]
- 12507 OZ **Construction of the optical-mechanical installation and calibration process technology on the basis of the digital twin** [12507-43]

- 12507 10 **Image-rejection multi-band frequency down-conversion based on photonic sampling** [12507-45]
- 12507 11 **Design and analysis of multi-axis optical compound machine tool** [12507-46]
- 12507 12 **Non-mechanical photoelectric tracking technology using liquid crystal phased array** [12507-47]
- 12507 13 **Study of roughness variation during fixed abrasive polishing based on KDP in anhydrous environment** [12507-50]
- 12507 14 **Research on piano online teaching instrument based on spherical off-axis four-reflective optical structure** [12507-51]
- 12507 15 **Study on surface and subsurface qualities in rotary ultrasonic vibration-assisted peripheral grinding of ULE** [12507-52]
- 12507 16 **Research on the high-quality, low-wear single point diamond turning process of single crystal germanium** [12507-53]
- 12507 17 **Simulation study of an ionization chamber detector with fast response time** [12507-54]
- 12507 18 **Study on optimization method of multi-point combined adhesive process for optical plane mirror** [12507-55]
- 12507 19 **A microwave photonic mixer with complete suppression of LO spurious** [12507-56]
- 12507 1A **Research on the photovoltaic conversion efficiency of power over fiber transmission based on OPGW power cable** [12507-58]
- 12507 1B **A signal transmission model for broadband microwave photonic link** [12507-59]
- 12507 1C **Research on assembly method of non-coaxial transmissive optical system** [12507-60]
- 12507 1D **Theoretical and experimental research on temperature measurement of motor rotor in variable speed process based on fiber Bragg grating sensor** [12507-61]
- 12507 1E **Research on the quantitative process technology of tightening torque of optical lens pressure ring** [12507-63]
- 12507 1F **Modulation type identification method of radar signal from optical frequency comb down-conversion receiving system** [12507-64]
- 12507 1G **A method for realizing real-time abnormal behavior recognition based on compressed video** [12507-65]
- 12507 1H **Bimorph mirror processing and fabrication research** [12507-66]
- 12507 1I **Defect suppression mechanism for laser in-situ assisted diamond cutting of reaction-bonded silicon carbide** [12507-67]

- 12507 1J **Acquisition and application of energy and time information in large container photon-counting imaging system** [12507-68]
- 12507 1K **Surface deformation technology of large-scale complex components based on Laplace** [12507-69]
- 12507 1L **Precision machining technology of high quality factor hemispherical resonator** [12507-71]
- 12507 1M **Theory and simulation of multi-channel backup transmission for anti-interference communication based on microwave photonics** [12507-72]
- 12507 1N **Theoretical analysis of joint hierarchical modulation and physical layer network coding for next passive optical networks** [12507-73]
- 12507 1O **The joint power-domain multiplexing and SSII mitigation scheme for IM DD downstream orthogonal frequency division multiple (OFDM-PON)** [12507-74]
- 12507 1P **Performance comparison of equalization techniques in Nyquist-16QAM direct detection transmission** [12507-75]
- 12507 1Q **Precision control and performance of new-generation integrated fiber positioners for LAMOST** [12507-76]
- 12507 1R **Optical testing of the primary mirror of the telescope of multispectral high-resolution imaging system** [12507-77]
- 12507 1S **Research on different medium-assisted quartz material processing technology based on femtosecond laser** [12507-78]
- 12507 1T **Microwave photonic radar imaging processing problem analysis and measured data processing results** [12507-79]
- 12507 1U **The analysis on the hopping speed of the high speed and large-range frequency hopping receiver based on the simultaneous photonic filtering and digitizing system** [12507-80]
- 12507 1V **Fiber Fabry-Perot sensor for partial discharges detection** [12507-81]
- 12507 1W **A novel instantaneous frequency measurement scheme with high precision assisted by photonics** [12507-83]
- 12507 1X **Deep learning-based image-like channelization for broadband receiver** [12507-84]
- 12507 1Y **A non-uniformity correction method for space-borne multichannel large array CMOS remote sensing camera based on image** [12507-87]
- 12507 1Z **Application of optical fiber sensor in strain monitoring of solid rocket motor shell** [12507-88]
- 12507 20 **The high-performance dichroic mirrors for biomedical detection** [12507-89]
- 12507 21 **The design of a near backscattering detection device for surface morphology of spherically bent crystal analyzer** [12507-90]

- 12507 22 **High sensitive TFBG sensing demodulation scheme based on microwave photonic interrogation** [12507-91]
- 12507 23 **Alignment of a catadioptric infrared optical system** [12507-92]
- 12507 24 **Research on ultra-smooth and high efficiency polishing technology of the third generation semiconductor single crystal SiC** [12507-97]
- 12507 25 **Optimization design of nozzle and analysis of flow field in fluid jet polishing** [12507-98]
- 12507 26 **Analysis of fill factor and diffraction influence on micro-lens array imaging system** [12507-99]
- 12507 27 **Suppression of the spectral overlap in interferometric optical vector analyzers by introducing a common mode branch** [12507-100]
- 12507 28 **Effect of the fill factor on microlens array scanning systems** [12507-101]
- 12507 29 **Fabrication of microlens on fused silica by femtosecond laser combined with wet etching** [12507-103]
- 12507 2A **A low cost rotational seismometer for seismic exploration** [12507-105]
- 12507 2B **30 m 64-QAM multicarrier photonic-wireless communication link in the 300 GHz band** [12507-106]
- 12507 2C **Design of an on-chip optical beamforming network based on dense wavelength division multiplexing** [12507-107]
- 12507 2D **Optimization of UWB-over-fiber system transmission performance** [12507-109]
- 12507 2E **Research on nonlinear relationship between rotation speed and material removal in wheel polishing technology** [12507-111]
- 12507 2F **Absolute wavefront measurement of lithography projection lens using random averaging method** [12507-113]
- 12507 2G **A high-sensitivity EFPI acoustic sensor based on silicone rubber diaphragm** [12507-114]
- 12507 2H **Study on laser ablation mechanism and laser machining technology of AlON ceramic materials** [12507-115]
- 12507 2I **Research on temperature and thermal stress in atmospheric plasma machining based on arc method** [12507-117]
- 12507 2J **Laser micro-nano manufacturing technology for liquid crystal microdroplets with diverse inner structures** [12507-118]
- 12507 2K **Research on the optical property stability of sol-gel antireflective films** [12507-119]

- 12507 2L **A coaxial assembling method of dual optical path system based on optical centering assembling** [12507-120]
- 12507 2M **Broadband random optoelectronic oscillator based on stimulated Brillouin scattering** [12507-121]
- 12507 2N **Research on the influence of depth information of different position sensitive detectors on coded imaging system** [12507-122]
- 12507 2O **Optimization algorithm for anti-collision planning of fiber elements based on divide-and-conquer weighting** [12507-124]
- 12507 2P **All-fiber in-amplifier mid-infrared enhanced supercontinuum generation** [12507-127]
- 12507 2Q **Research on assembly and rectification method of complex offset axis infrared diffraction camera** [12507-129]
- 12507 2R **Adaptive method of free-form surfaces measurement based on particle swarm optimization algorithm** [12507-132]
- 12507 2S **Top-level design consideration of on-orbit assembling space telescope technology: a solution to next generation 10m-class large aperture space telescope** [12507-133]
- 12507 2T **Design of neutron and x-ray CT system in ERNI of CSNS** [12507-135]
- 12507 2U **High-resolution white light scanning stitching measurement of microstructure** [12507-136]
- 12507 2V **TianLin: a UV-optical large aperture space telescope for habitable worlds** [12507-137]
- 12507 2W **Precision polishing of the mandrel for x-ray grazing incidence mirrors in the Einstein probe** [12507-128]
- 12507 2X **Research on amplitude and frequency stability of basic optoelectronic oscillator** [12507-102]

Conference Committee

Conference Chairs

Huilin Jiang, Changchun University of Science and Technology (China)
Jiubin Tan, Harbin Institute of Technology (China)
Xiangang Luo, Institute of Optics and Electronics (China)
Saulius Juodkazis, Swinburne University of Technology (Australia)

Executive Chairs

Xuejun Zhang, Changchun Institute of Optics and Fine Mechanics and Physics (China)
Hongbo Sun, Tsinghua University (China)
Yuegang Fu, Changchun University of Science and Technology (China)

Program Committee

Keyan Dong, Changchun University of Science and Technology (China)
Xiaofeng Yue, Changchun University of Technology (China)
Ge Zhang, Changchun Institute of Optics, Fine Mechanics and Physics (China)
Lingbao Kong, Fudan University (China)
Dawei Zhang, University of Shanghai for Science and Technology (China)
Donglin Xue, Changchun Institute of Optics, Fine Mechanics and Physics (China)
Changxi Xue, Changchun University of Science and Technology (China)
Ping Gao, Institute of Optics and Electronics (China)
Jiang Guo, Dalian University of Technology (China)
Shijun Ji, Jilin University (China)
Wenhao Li, Changchun Institute of Optics, Fine Mechanics and Physics (China)
Huasong Liu, Tianjin Jinhang Technical Physics Institute (China)
Zhiying Liu, Changchun University of Science and Technology (China)
Xiaoqiang Peng, National University of Defense Technology (China)
Yunfeng Peng, Xiamen University (China)
Mingjun Ren, Shanghai Jiao Tong University (China)
Sujuan Wang, Guangdong University of Technology (China)
Chaoyang Wei, Shanghai Institute of Optics and Fine Mechanics, (China)
Jiyou Zhang, Zhejiang Dali Technology Company, Ltd. (China)
Wenjun Zong, Harbin Institute of Technology (China)

Session Chairs

- 1 Large Optical Mirrors and Telescopes
Donglin Xue, Changchun Institute of Optics, Fine Mechanics and Physics (China)
- 2 Ultra-Precision Optical Processing Technologies and Equipment
Lingbao Kong, Fudan University (China)
- 3 Optical Testing, Measuring Technologies, and Equipment
Wenhao Li, Changchun Institute of Optics, Fine Mechanics and Physics (China)
- 4 New Systems, Concepts, Designs, Technologies, and Methods
Changxi Xue, Changchun University of Science and Technology (China)
- 5 Optical Micro-Nano Manufacturing Technologies and Applications
Qidai Chen, Jilin University (China)
- 6 High-Performance Optical Manufacturing Technologies and Equipment
Jiang Guo, Dalian University of Technology (China)
- 7 Novel Manufacturing Technologies, Processes, and Approaches
Xueke Xue, Shanghai Hengyi Optics Precision Machinery Company, Ltd. (China)
- 8 Advanced Technology and Equipment of Optical Coatings
Jinlong Zhang, Tongji University (China)
- 9 Optical Alignment, System Integration, and Evaluation Technologies
Jiyou Zhang, Zhejiang Dali Technology Company, Ltd. (China)
- 10 Optofluidic Chip Manufacturing and Liquid Crystal Technologies and Applications
Dawei Zhang, University of Shanghai for Science and Technology (China)
- 11 Laser and Optoelectronic Devices and Applications
Tianshu Wang, Changchun University of Science and Technology (China)
- 12 Model-Based Optical System Engineering
Shijun Ji, Jilin University (China)
