Volume 12847

Proceedings of SPIE, 1605-7422, V. 12847

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Multiphoton Microscopy in the Biomedical Sciences XXIV, edited by Ammasi Periasamy,

Peter T. C. So, Karsten König, Proc. of SPIE Vol. 12847, 1284701

© 2024 SPIE · 1605-7422 · doi: 10.1117/12.3030050

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Multiphoton Microscopy in the Biomedical Sciences XXIV*, edited by Ammasi Periasamy, Peter T. So, Karsten König, Proc. of SPIE 12847, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

KEYNOTE

12847 02 **Femtosecond fiber laser for medical one-photon confocal reflectance microscopy and multiphoton tomography (Keynote Paper)** [12847-1]

TECHNOLOGY DEVELOPMENT AND COMMERCIALIZATION I

12847 03 **Femtosecond fiber delivery at 920 nm for two-photon microscopy (Invited Paper)** [12847-6]

TECHNOLOGY DEVELOPMENT AND COMMERCIALIZATION II

12847 04 **Enhancing the resolution of STED microscopy by SPLIT and flimGANE (Invited Paper)** [12847-8]

12847 05 **STELLARIS 8 DIVE: a rainbow of possibilities with multiphoton excitation and lifetime-based information (Invited Paper)** [12847-11]

TECHNOLOGY DEVELOPMENT AND COMMERCIALIZATION III

12847 06 **Green multiphoton tomograph powered by sunlight (Invited Paper)** [12847-13]

12847 07 **Unbiased quantitative ratiometric measurements in multiphoton microscopy with a generalized model (Invited Paper)** [12847-14]

TECHNOLOGY DEVELOPMENT I

12847 08 **Multiphoton imaging of the formation of fluorescent advanced glycation end products in tissues** [12847-18]

12847 09 **Imaging microplastics with multiphoton tomographs** [12847-19]

JENLAB YOUNG INVESTIGATOR AWARD ORAL PRESENTATIONS

- 12847 0A **Non-degenerate two-photon imaging of deep rodent cortex using indocyanine green in the water absorption window (JenLab Young Investigator Award) [12847-26]**
- 12847 0B **VAMPIRE microscopy enables fast and simultaneous structural, metabolic, and chemical characterization of living tissues label-free [12847-27]**
- 12847 0C **Two-photon endomicroscopy of the native thymus [12847-28]**
- 12847 0D **Determining the helical pitch and relative polarity of collagen using polarization-resolved SHG (JenLab Young Investigator Award - Second Place) [12847-29]**
- 12847 0E **Multimodal metabolic imaging of the ovary under diet manipulation during aging process [12847-30]**
- 12847 0F **Simultaneous acousto-optic modulation and multiphoton fluorescence imaging provides functional imaging and new image details [12847-31]**

TECHNOLOGY DEVELOPMENT III

- 12847 0G **High resolution two-photon imaging in deep mouse brain through thinned-skull based on alpha-FSS adaptive optics (Invited Paper) [12847-32]**

METABOLISM: NADH/FAD/TRP

- 12847 0H **Metabolic imaging with FLIM/PLIM indirubin derivatives: an ultrafast window into cellular metabolism and oxygen consumption [12847-40]**

FLIM/FRET/FCS II

- 12847 0I **Tracking protein oligomerization and aggregation in live cells by number and brightness (Invited Paper) [12847-48]**

FLIM/FRET/FCS III

- 12847 0J **Development of widefield time-resolved fluorescence anisotropy imaging (TR-FAIM) using a single photon avalanche diode (SPAD) array [12847-53]**

POSTER SESSION

- 12847 OK **Nonlinear super-resolution imaging in living zebrafish (Best Poster Award)** [12847-23]
- 12847 OL **A comparative study of detecting relative glycation of porcine oral mucosa and skin** [12847-58]
- 12847 OM **Thermal investigation for determining safe laser power limits in two-photon line excitation array detection microscopy** [12847-63]
- 12847 ON **Four-dimensional image formation theory for all optical microscopy including optical coherence tomography** [12847-64]
- 12847 OO **Rigorous investigation and comparison of different fluorescence lifetime imaging microscopy (FLIM) techniques analyzed using the phasor plot** [12847-65]
- 12847 OP **Remote focusing for 2-photon microscopy to follow action potential propagation transmurally in acute rabbit cardiac slices (Best Poster Award)** [12847-67]
- 12847 OQ **In vivo two-photon FLIM imaging to investigate metabolism in live animals** [12847-68]
- 12847 OR **Spatially resolved SRS imaging of cells and tissues using circular polarization** [12847-71]

Conference Committee

Symposium Chairs

Sergio Fantini, Tufts University (United States)
Paola Taroni, Politecnico di Milano (Italy)

Program Track Chairs

Ammasi Periasamy, University of Virginia (United States)
Daniel L. Farkas, University of Southern California (United States) and
Spectral Molecular Imaging (United States)

Conference Chairs

Ammasi Periasamy, University of Virginia (United States)
Peter T. C. So, Massachusetts Institute of Technology (United States)
Karsten König, University des Saarlandes (Germany) and JenLab
GmbH (Germany)

Conference Program Committee

Margarida Barroso, Albany Medical College (United States)
Wolfgang Becker, Becker & Hickl GmbH (Germany)
Paul J. Campagnola, University of Wisconsin-Madison (United States)
Ji-Xin Cheng, Boston University (United States)
Alberto Diaspro, Istituto Italiano di Tecnologia (Italy)
Michelle Digman, University of California, Irvine (United States)
Chen-Yuan Dong, National Taiwan University (Taiwan)
Kevin W. Eliceiri, University of Wisconsin-Madison (United States)
Conor L. Evans, Wellman Center for Photomedicine (United States)
Scott Fraser, The University of Southern California (United States)
Katsumasa Fujita, Osaka University (Japan)
Stefan W. Hell, Max-Planck-Institut für Biophysikalische Chemie
(Germany)
Na Ji, University of California, Berkeley (United States)
Fu-Jen Kao, National Yang Ming Chiao Tung University (Taiwan)
Sudipta Maiti, Tata Institute of Fundamental Research (India)
Wei Min, Columbia University (United States)
Junle Qu, Shenzhen University (China)
Ian A. Read, Spectra-Physics, a division of MKS Instruments
(United States)
Angelika C. Rueck, University Ulm (Germany)
Lingyan Shi, University of California, San Diego (United States)
Klaus Suhling, King's College London (United Kingdom)

Yuansheng Sun, ISS, Inc. (United States)
Karissa Tilbury, The University of Maine (United States)
Steven S. Vogel, National Institutes of Health (United States)
Chris Xu, Cornell University (United States)
Elena V. Zagaynova, Privolzhsky Research Medical University
(Russian Federation)
Ewa Zarnowska, Coherent Corporation (United States)
Bernhard Zimmermann, Carl Zeiss Jena GmbH (Germany)
