PROCEEDINGS OF SPIE

Photonics and Optoelectronics Meetings (POEM) 2011

Laser and Terahertz Science and Technology

Jianquan Yao
X. C. Zhang
Dapeng Yan
Jinsong Liu
Editors

2–5 November 2011
Wuhan, China

Organized by
Wuhan National Laboratory for Optoelectronics (China)

Sponsored by
Huazhong University of Science and Technology (China) • China Hubei Provincial Science and Technology Department • Wuhan East Lake National Innovation Model Zone (Optics Valley of China, OVC) • The Optical Society • Hubei Provincial Foreign Experts Affairs Bureau

Supported by
Ministry of Education (China) • State Administration of Foreign Experts Affairs (China) • National Natural Science Foundation Committee of China

Cooperating Organizations
IOP—Institute of Physics • The Laser Institute of America (United States) • IET—The Institution of Engineering and Technology • International Biomedical Optics Society • IEEE Photonics Society (Singapore and Hong Kong Chapters) • Chinese Optical Society

Published by
SPIE

Volume 8330

Proceedings of SPIE, 0277-786X, v. 8330

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

Symposium Committees

Symposium Chairs

Chaohui Ye, Wuhan National Laboratory for Optoelectronics (China)
Zhong Lin Wang, Georgia Institute of Technology (United States) and Wuhan National Laboratory for Optoelectronics (China)
Bingkun Zhou, Tsinghua University (China)

International Advisory Committee

Stephen Z. D. Cheng, University of Akron (United States)
Yibing Cheng, Monash University (Australia) and Wuhan National Laboratory for Optoelectronics (China)
Min Gu, Swinburne University of Technology (Australia)
Andrew B. Holmes, The University of Melbourne (Australia)
Chinlon Lin, Bell Laboratories (retired, United States)
Shenggang Liu, University of Electronic Science and Technology of China (China)
Jesper Moerk, Technical University of Denmark (Denmark)
Dennis L. Matthews, University of California, Davis (United States)
Jiacong Shen, Jilin University (China)
Chester C. T. Shu, Chinese University of Hong Kong (Hong Kong, China)
Valery V. Tuchin, Saratov State University (Russian Federation)
Bruce Tromberg, University of California, Irvine (United States)
Peiheng Wu, University of Nanjing (China)
Alan Willner, University of Southern California (United States)
Lihong Wang, Washington University in St. Louis (United States)
C. P. Wong, Georgia Institute of Technology (United States)
Jianquan Yao, Tianjin University (China) and Wuhan National Laboratory for Optoelectronics (China)
Xi Zhang, Tsinghua University (China)
X. C. Zhang, Rensselaer Polytechnic Institute (United States) and Wuhan National Laboratory for Optoelectronics (China)

Program Committee

Qingming Luo, *Chair*, Wuhan National Laboratory for Optoelectronics (China)
Perry Ping Shum, Nanyang Technological University (Singapore) and Wuhan National Laboratory for Optoelectronics (China)
Yibing Cheng, Monash University (Australia) and Wuhan National Laboratory for Optoelectronics (China)
Junhao Chu, Shanghai Institute of Technical Physics (China)
Zhijiang Dong, Aqualite Company, Ltd. (China)
Pierre Galarneau, National Optics Institute, INO (Canada)

Bin Hu, University of Tennessee (United States) and Wuhan National Laboratory for Optoelectronics (China)
Erich Kasper, Universität Stuttgart (Germany)
Xun Li, McMaster University (Canada) and Wuhan National Laboratory for Optoelectronics (China)
Xu Liu, Zhejiang University (China)
Richard Penty, University of Cambridge (United Kingdom)
Chester Shu, Chinese University of Hong Kong (Hong Kong, China)
Valery V. Tuchin, Saratov State University (Russian Federation)
Lihong Wang, Washington University in St. Louis (United States)
Dapeng Yan, Raycus Fiber Laser Technologies Company Ltd. (China)
Jianquan Yao, Tianjin University (China) and Wuhan National Laboratory for Optoelectronics (China)
Jinzhong Yu, Institute of Semiconductors (China)
X. C. Zhang, Rensselaer Polytechnic Institute (United States) and Wuhan National Laboratory for Optoelectronics (China)
Zisen Zhao, Fiberhome (China), Wuhan Research Institute of Post and Telecommunications (China), and Wuhan National Laboratory for Optoelectronics (China)

Local Organizing Committee

Lin Lin, *Chair,* Wuhan National Laboratory for Optoelectronics (China)
Xiwen Sun, Administration Committee of Wuhan East Lake Hi-Tech Development Zone (China)
Sihai Chen, Wuhan National Laboratory for Optoelectronics (China)
Tao Jiang, Huazhong University of Science and Technology (China)
Pengcheng Li, Wuhan National Laboratory for Optoelectronics (China)
Jinsong Liu, Huazhong University of Science and Technology (China)
Yan Shen, Huazhong University of Science and Technology (China)
Wen Sun, Chutian Laser Group (China)
Jinsong Xia, Wuhan National Laboratory for Optoelectronics (China)
Changsheng Xie, Wuhan National Laboratory for Optoelectronics (China)
Xinliang Zhang, Wuhan National Laboratory for Optoelectronics (China)
Zhihong Zhang, Wuhan National Laboratory for Optoelectronics (China)
Yuandi Zhao, Wuhan National Laboratory for Optoelectronics (China)
Xiao Zhu, Huazhong University of Science and Technology (China)

Local Secretariat

Xiaochun Xiao, Wuhan National Laboratory for Optoelectronics (China)
Weiwei Dong, Wuhan National Laboratory for Optoelectronics (China)

Conference Committee

Conference Chairs

Jianquan Yao, Tianjin University (China) and Wuhan National Laboratory for Optoelectronics (China)
X. C. Zhang, Rensselaer Polytechnic Institute (United States) and Wuhan National Laboratory for Optoelectronics (China)
Dapeng Yan, Raycus Fiber Laser Technologies Company Ltd. (China)
Jinsong Liu, Huazhong University of Science and Technology (China)

Session Chairs

Juncheng Cao, Shanghai Institute of Microsystem and Information Technology (China)
Jinsong Liu, Huazhong University of Science and Technology (China)
Patrick Mounaix, LOMA, Talence, Aquitaine (France)
Alexander Shkurinov, Lomonosov Moscow State University (Russian Federation)
Masahiko Tani, Research Center for Development of Far-Infrared Region (Japan)
Dapeng Yan, Raycus Fiber Laser Technologies Company Ltd. (China)
Jianquan Yao, Tianjin University (China) and Wuhan National Laboratory for Optoelectronics (China)

Introduction

The 4th International Photonics and Optoelectronics Meetings (POEM 2011) combined with the 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011) was held during 2–5 November 2011 at Wuhan Science & Technology Convention & Exhibition Center, Wuhan, P.R. China. This volume contains manuscripts of a selection from the invited talks delivered at the conference and the poster presentations.

The POEM is an international conference of broad scale and multidiscipline, which is extended over a large area of optoelectronics, initiated by WNLO. Aimed at giving full play to the industrial advantage of Wuhan Optics Valley of China, building an independent brand for our international conference, facilitating the regional economic development, promoting the academic reputation and international status of WNL), domestic and internationally renowned academic institutes and organizations in the area of optoelectronics were invited to provide professional support. On such an international platform, POEM was built into a high-level academic conference that integrates academia and industry with the support from Wuhan Optics Valley of China.

POEM 2011 broadened the themes, conducting extensive discussions on four major areas including biomedical photonics, industrial photonics, information photonics and photonics for energy.

POEM 2011 was open to all individuals and entities, domestic and international, which have interest in our four technical areas. The six sub conferences of POEM 2011 were: (1) 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011); (2) Laser and Tera-Hertz Science and Technology (LTST); (3) Optoelectronic Sensing and Imaging (OSI); (4) Optoelectronic Devices and Integration (OEDI); (5) Optical Communication Systems and Networking (OCSN); and (6) Solar Cells, Solid State Lighting and Information Display Technologies (SSID).

Besides the six sub conferences in four major areas, POEM was organized along with symposiums and workshops including: Workshop on Technology Transfer Models, Sino-Russia Symposium on Biophotonics and Biomedical Photonic, the China-Australia Symposium on Optoelectronic Materials and Devices, 1st Workshop on International Laser Technology and Industrialization, 5th Sino-Russian Laser Technology Forum, 2nd International Workshop on Nanomaterials and Nanosystems (INN 2011). The 40th anniversary of the College of Optoelectronic Science and Engineering at HUST was also celebrated at the same time. Activities such as the Workshop on Immunophotonics, the Workshop on Optical Imaging in Brain Connectivity, the Workshop on Organic Spin Optoelectronics, as well as training courses in Optoelectronic Devices and Integration, and courses given by

travelogue scholars from OSA were arranged to provide a variety of choices for the attendees.

POEM owes its distinguished features to its wide-ranging topics and contents, highly professional delegates, and a strong academic atmosphere. Presentations given by experts worldwide demonstrated previously unpublished cutting-edge scientific achievements. Popular activities such as speeches and posters were intensively organized to provide a unique and immediate access for scientists, entrepreneurs, and students all over the world.

We gratefully thank the financial support by 111 Project (B07038), the National Natural Science Foundation Committee of China (NNSFC)'s funding support. We would like to thank all the authors for their contributions to POEM 2011 and all the members of the committees for their cooperation and time spent reviewing submissions. We would like to extend our sincere thanks for your attendance, support, and contributions at POEM 2011 in Wuhan.

According to different technical areas, the proceedings were divided into six topical volumes:

- 10th International Conference on Photonics and Imaging in Biology and Medicine (PIBM 2011),
- Laser and Tera-Hertz Science and Technology (LTST),
- Optoelectronic Sensing and Imaging (OSI),
- Optoelectronic Devices and Integration (OEDI),
- Optical Communication Systems and Networking (OCSN), and
- Solar Cells, Solid State Lighting and Information Display Technologies (SSID).
